

WATER WATCH REPORT

July 8, 2024

Supply Reservoir Contents

| Reservoir | Capacity | | Current Usable Contents (acre-feet) | Percent Full | | |
|------------------|----------------|----------------|---|--------------|--------------|----------------------|
| | (acre-feet) | | | Current | Last Year | Historical Median |
| | Total | Usable | | | | |
| Antero | 20,122 | 20,067 | 19,716 | 98% | 100% | 100% |
| Eleven Mile | 97,779 | 97,779 | 101,350 | 104% | 101% | 103% |
| Cheesman | 79,064 | 79,064 | 77,924 | 99% | 100% | 99% |
| Marston | 19,108 | 13,133 | 9,906 | 75% | 72% | 76% |
| Strontia Springs | 7,863 | 7,163 | 6,910 | 96% | 87% | 95% |
| Chatfield | 28,709 | 12,415 | 10,859 | 87% | 100% | 79% |
| Dillon | 257,304 | 249,095 | 252,311 | 101% | 101% | 101% |
| Gross* | 41,811 | 29,811 | 15,932 | 53% | 53% | 97% |
| Ralston | 10,776 | 7,276 | 6,877 | 95% | 96% | 93% |
| Meadow Creek | 5,370 | 4,520 | 4,528 | 100% | 100% | 90% |
| Total | 567,906 | 520,323 | 506,314 | 97% | 97% | 97% |

*Gross Reservoir storage is limited to 29,938 acre feet in total storage during construction activities. The percent full figures are based on the normal usable capacity of 29,811 acre feet.

Daily Use

Supply Reservoir Contents

Note: Denver Water forecasts seasonal reservoir storage contents under dry future weather, normal future weather and wet future weather scenarios.

Gross Reservoir storage is limited to 29,938 acre feet in total storage during construction activities. The percent full figures are based on the normal usable capacity of 29,811 acre feet.

July 8, 2024

July Precipitation

Cumulative Precipitation: South Platte River

Cumulative Precipitation: Colorado River

| % of 2024 Expected Daily Use | 105% | 101% | 97% | 103% | 93% | 110% | 103% | | | | | | 102% |

Notes: 1) "AF" denotes acre-feet. "MG" denotes million gallons. 2) Expected Daily Use is based on historical use with normal weather conditions. 3) The predicted end-of-month supply reservoir contents figures assume normal weather after July 1st, 2024. 4) The differences between predicted and actual end-of-month supply reservoir contents are the result of normal estimation error of daily use, supply, evaporation, carriage losses and raw water deliveries. 5) Predicted supply reservoir contents last updated on July 1st, 2024. 6) Daily water figures are subject to change.

Lake Powell Report*

* Denver Water gets half of its water supply from the Colorado River and closely monitors conditions at Lake Powell and within the greater Colorado River Basin.
