

WATER WATCH REPORT

November 12, 2024

Supply Reservoir Contents

Reservoir	Capacity		Current Usable Contents (acre-feet)	Percent Full		
	(acre-feet)			Current	Last Year	Historical Median
	Total	Usable				
Antero	20,122	20,067	17,958	87%	98%	100%
Eleven Mile	97,779	97,779	99,968	102%	102%	101%
Cheesman	79,064	79,064	71,225	90%	94%	81%
Marston	19,108	13,133	10,723	82%	79%	45%
Strontia Springs	7,863	7,163	6,545	91%	81%	93%
Chatfield	28,709	12,415	5,290	43%	82%	51%
Dillon	257,304	249,095	208,036	84%	87%	95%
Gross*	41,811	29,811	10,176	34%	38%	66%
Ralston	10,776	7,276	5,995	82%	64%	62%
Meadow Creek	5,370	4,520	-	0%	0%	22%
Total	567,906	520,323	435,916	84%	87%	85%

*Gross Reservoir storage is limited to 29,938 acre feet in total storage during construction activities. The percent full figures are based on the normal usable capacity of 29,811 acre feet.

Daily Use

Supply Reservoir Contents

Acre-Feet

Note: Denver Water forecasts seasonal reservoir storage contents under dry future weather, normal future weather and wet future weather scenarios.

Gross Reservoir storage is limited to 29,938 acre feet in total storage during construction activities. The percent full figures are based on the normal usable capacity of 29,811 acre feet.

November Precipitation

Snowpack: South Platte River Watershed

Snowpack: Colorado River Watershed

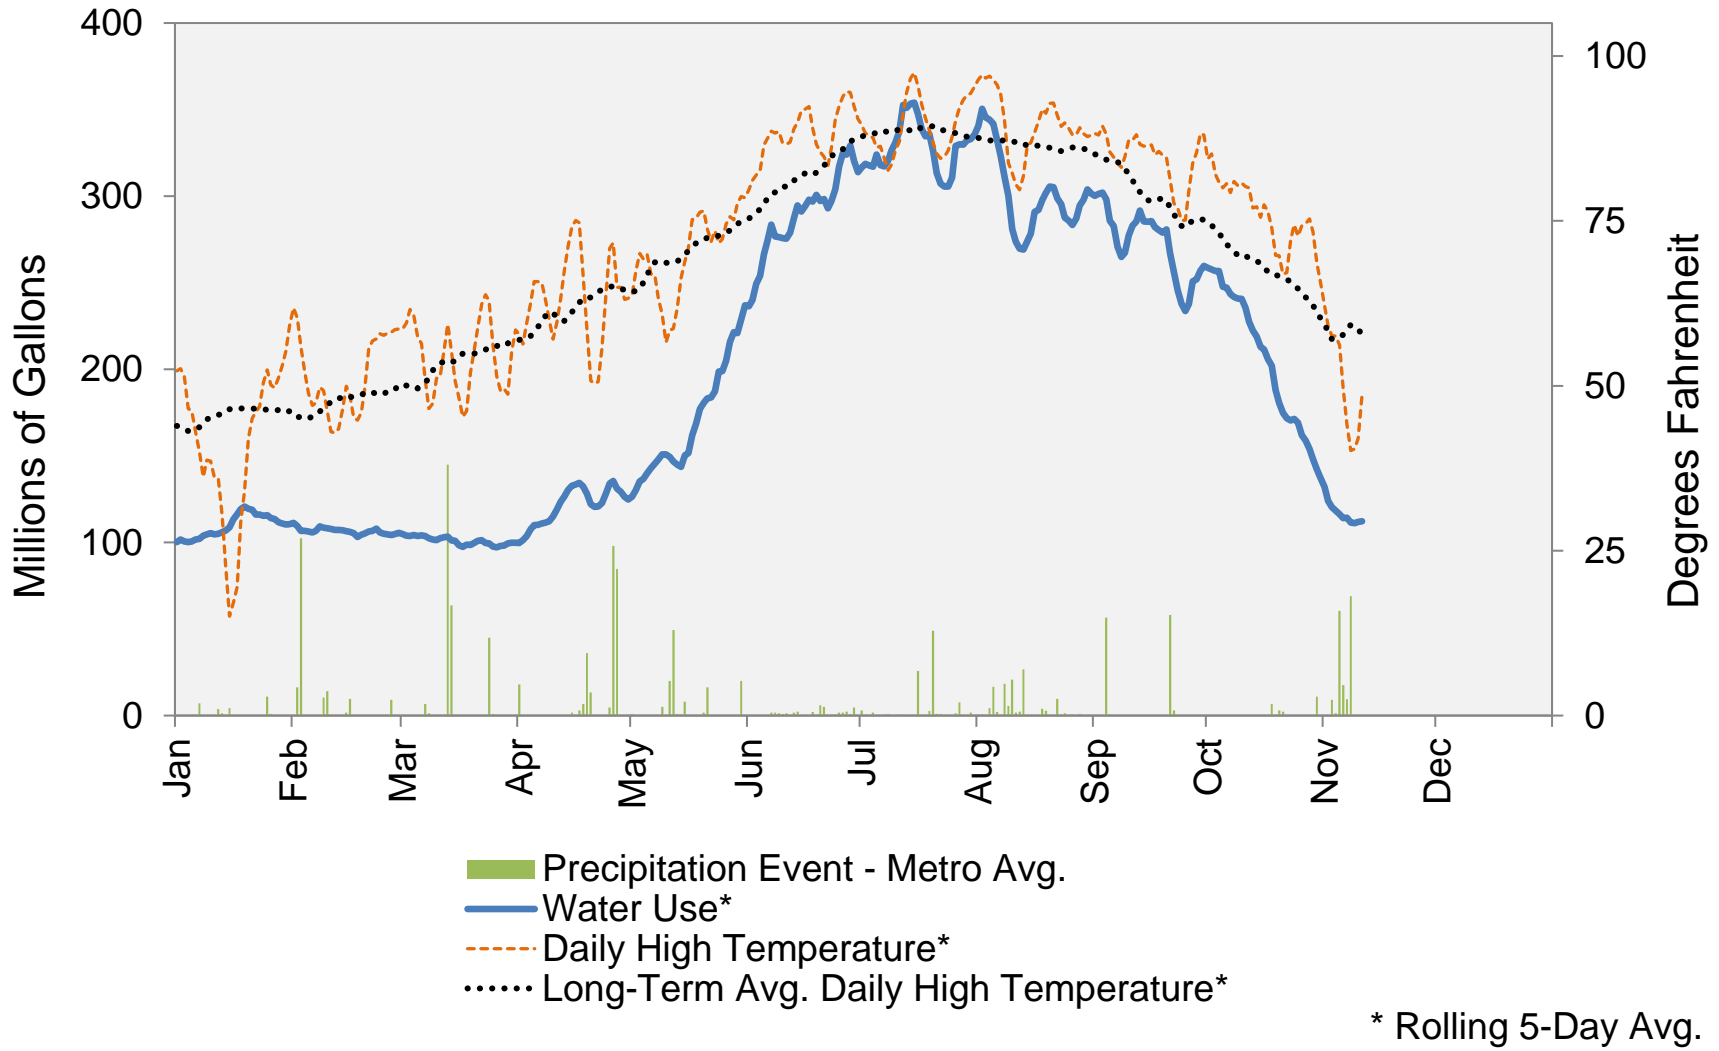

Cumulative Precipitation: South Platte River

Cumulative Precipitation: Colorado River

2024 Water Use and Weather Conditions

November 12, 2024

Denver Water Use and Reservoir Contents 2024													
	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	YTD-Avg
Predicted End-of-Month Supply Reservoir Contents (Full = 520,323 AF)	441,800

Notes: 1) "AF" denotes acre-feet. "MG" denotes million gallons. 2) Expected Daily Use is based on historical use with normal weather conditions. 3) The predicted end-of-month supply reservoir contents figures assume normal weather after November 1st, 2024. 4) The differences between predicted and actual end-of-month supply reservoir contents are the result of normal estimation error of daily use, supply, evaporation, carriage losses and raw water deliveries. 5) Predicted supply reservoir contents last updated on November 5th, 2024. 6) Daily water figures are subject to change.

Lake Powell Report*

Colorado River Above Lake Powell Snowpack

Lake Powell Elevation (2001-Current)

* Denver Water gets half of its water supply from the Colorado River and closely monitors conditions at Lake Powell and within the greater Colorado River Basin.
