

# WATER WATCH REPORT

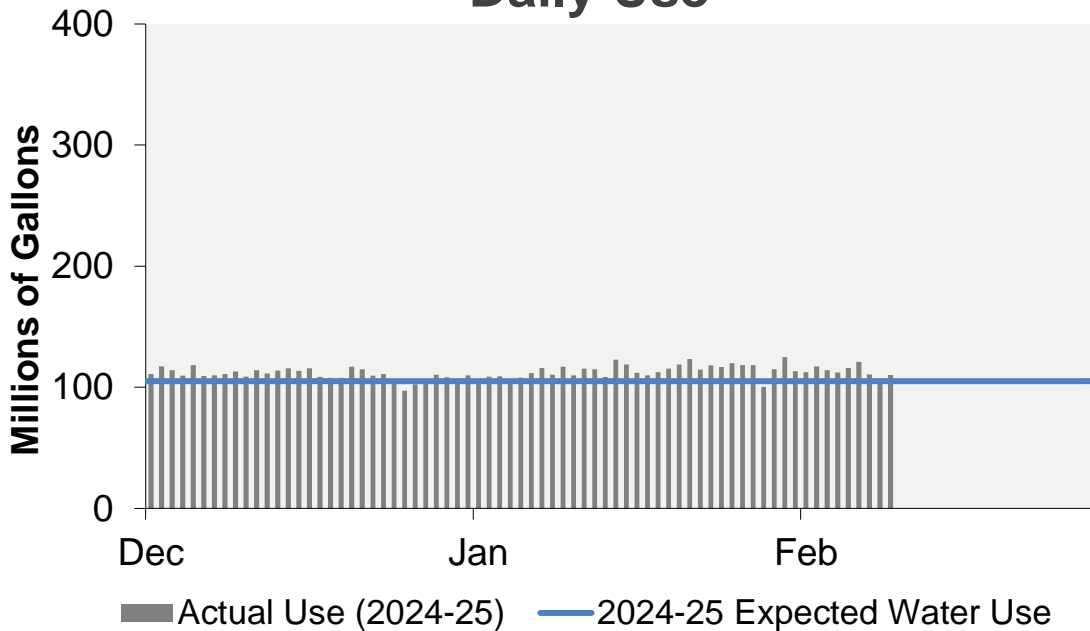

February 10, 2025

## Supply Reservoir Contents

Reservoir	Capacity		Current Usable Contents (acre-feet)	Percent Full		
	(acre-feet)			Current	Last Year	Historical Median
	Total	Usable				
Antero	20,122	20,067	18,564	93%	101%	99%
Eleven Mile	97,779	97,779	99,795	102%	102%	102%
Cheesman	79,064	79,064	73,559	93%	86%	83%
Marston	19,108	13,133	10,717	82%	71%	53%
Strontia Springs	7,863	7,163	6,308	88%	80%	93%
Chatfield	28,709	12,415	10,889	88%	99%	92%
Dillon	257,304	249,095	198,156	80%	85%	90%
Gross*	41,811	29,811	7,673	26%	19%	47%
Ralston	10,776	7,276	3,739	51%	67%	56%
Meadow Creek	5,370	4,520	-	0%	0%	12%
<b>Total</b>	<b>567,906</b>	<b>520,323</b>	<b>429,400</b>	<b>83%</b>	<b>84%</b>	<b>81%</b>

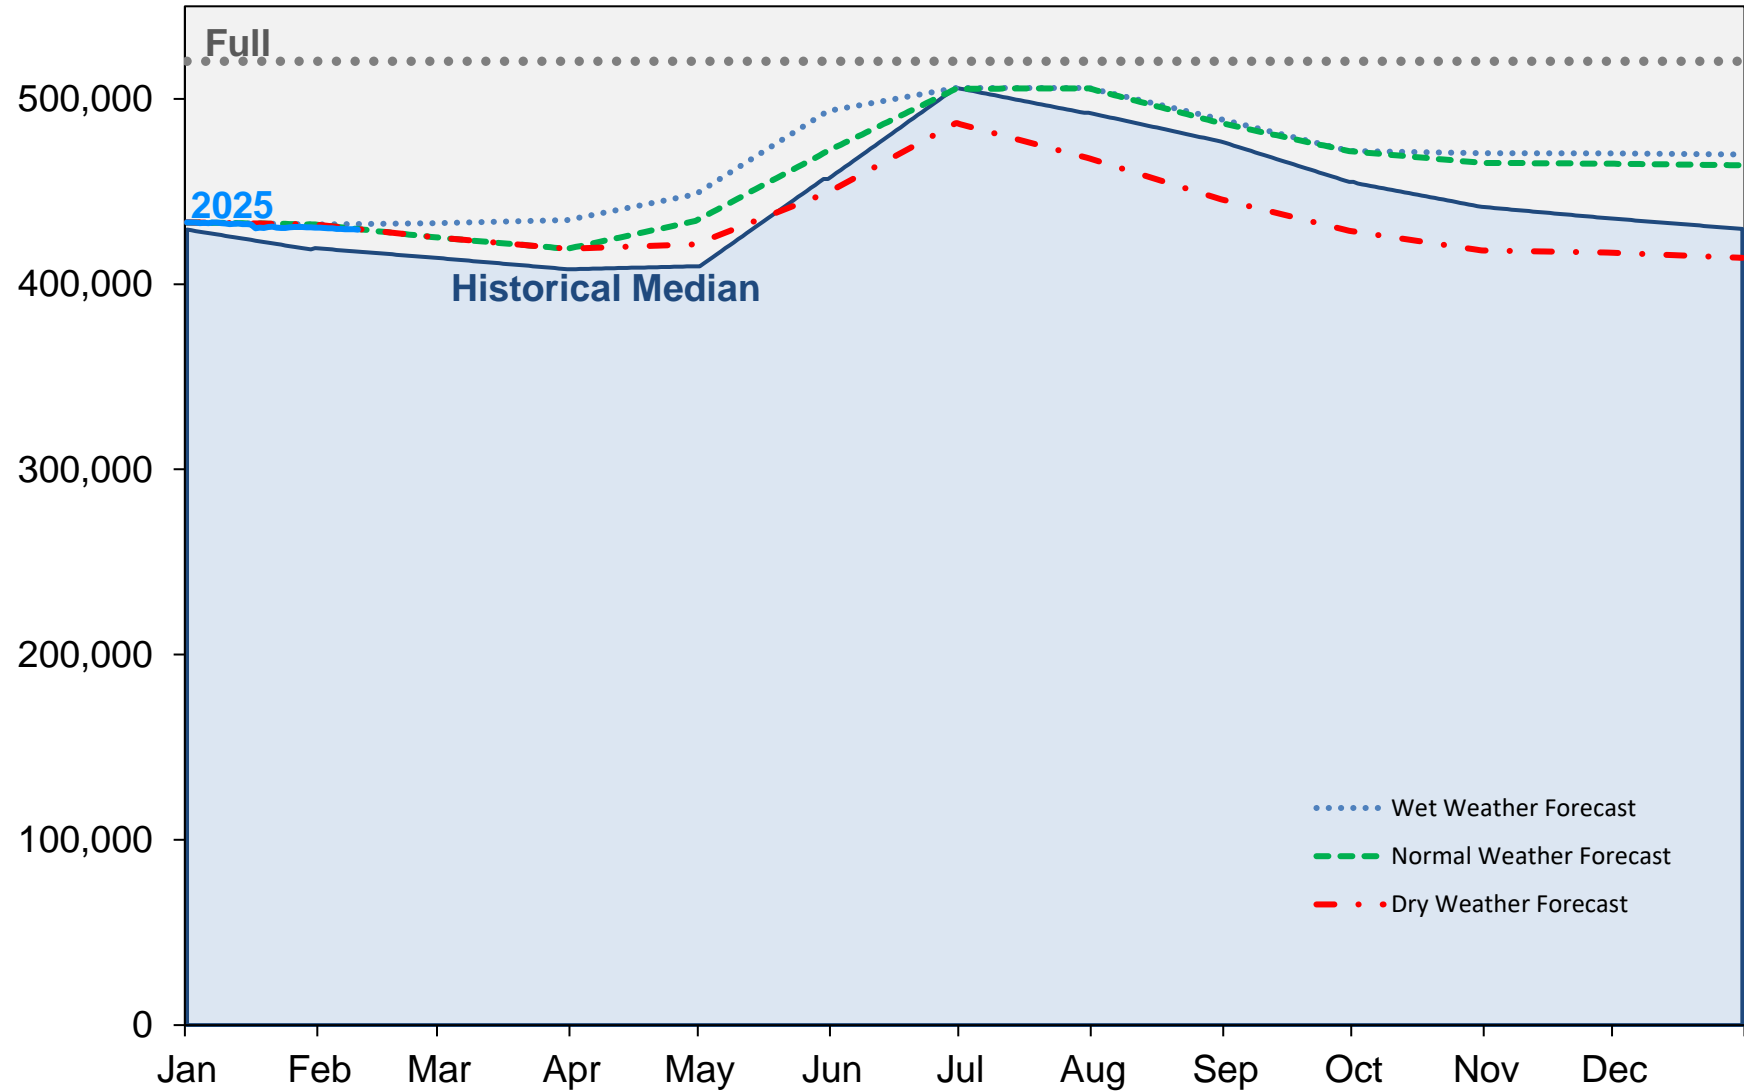

\*Gross Reservoir storage is limited to 29,938 acre feet in total storage during construction activities. The percent full figures are based on the normal usable capacity of 29,811 acre feet.

## Daily Use

# Supply Reservoir Contents

Acre-Feet

Note: Denver Water forecasts seasonal reservoir storage contents under dry future weather, normal future weather and wet future weather scenarios.

Gross Reservoir storage is limited to 29,938 acre feet in total storage during construction activities. The percent full figures are based on the normal usable capacity of 29,811 acre feet.

# February Precipitation

### Snowpack: South Platte River Watershed

### Snowpack: Colorado River Watershed

### Cumulative Precipitation: South Platte River

### Cumulative Precipitation: Colorado River

February 10, 2025

Denver Water Use and Reservoir Contents 2025													
	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	YTD-Avg
Predicted End-of-Month Supply Reservoir Contents (Full = 520,323 AF)	424,700												
Actual End-of-Month Supply Reservoir Contents (AF)	430,582												
Actual % Full	83%												
Historical Median % Full	81%	80%	79%	79%	88%	98%	95%	92%	88%	85%	84%	83%

Monthly Average	114	113											114
% of 2025 Expected Daily Use	108%	108%											108%

Notes: 1) "AF" denotes acre-feet. "MG" denotes million gallons. 2) Expected Daily Use is based on historical use with normal weather conditions. 3) The predicted end-of-month supply reservoir contents figures assume normal weather after February 10th, 2025. 4) The differences between predicted and actual end-of-month supply reservoir contents are the result of normal estimation error of daily use, supply, evaporation, carriage losses and raw water deliveries. 5) Predicted supply reservoir contents last updated on February 10th, 2025. 6) Daily water figures are subject to change.

# Lake Powell Report\*

## Colorado River Above Lake Powell Snowpack

## Lake Powell Elevation (2001-Current)

\* Denver Water gets half of its water supply from the Colorado River and closely monitors conditions at Lake Powell and within the greater Colorado River Basin.
