

## WATER WATCH REPORT

February 5, 2018

### Supply Reservoir Contents

Reservoir	Capacity		Current Usable Contents (acre-feet)	Percent Full		
	Total (acre-feet)	Usable		Current	Last Year	Historic Median
Antero	19,881	19,826	20,064	101%	72%	99%
Eleven Mile	97,779	97,779	99,658	102%	102%	102%
Cheesman	79,064	79,064	69,831	88%	89%	83%
Marston	19,256	13,133	6,457	49%	40%	54%
Strontia Springs	7,863	7,163	6,297	88%	89%	93%
Chatfield	27,076	10,782	6,128	57%	92%	92%
Dillon	257,304	249,095	234,986	94%	88%	90%
Gross	41,811	29,811	16,571	56%	39%	48%
Ralston	10,776	7,276	3,997	55%	59%	58%
Meadow Creek	5,370	4,520	1,185	26%	0%	12%
<b>Total</b>	<b>566,180</b>	<b>518,449</b>	<b>465,174</b>	<b>90%</b>	<b>85%</b>	<b>81%</b>

Note: The Board has designated 200,000 acre feet of stored water to protect against unforeseen circumstances such as a dam or tunnel failure, a water quality crisis, climate change or catastrophic drought.

# Supply Reservoir Contents

Note: The Board has designated 200,000 acre feet of stored water to protect against unforeseen circumstances such as a dam or tunnel failure, a water quality crisis, climate change or catastrophic drought.

February 5, 2018

# February Precipitation

### Cumulative Precipitation: South Platte River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper South Platte diversion facilities.

### Cumulative Precipitation: Colorado River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper Colorado diversion facilities.

### Snowpack: South Platte River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper South Platte diversion facilities.

### Snowpack: Colorado River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper Colorado diversion facilities.

	31	104											
Monthly Average	104	100											104
% of 12-16 Avg. Daily Use	94%	90%											94%

Notes: 1) "AF" denotes acre-feet. "MG" denotes million gallons. 2) Expected Daily Use is based on historical use with normal weather conditions. 3) The predicted end-of-month supply reservoir contents figures assume normal weather after January 1, 2018. 4) The differences between predicted and actual end-of-month supply reservoir contents are the result of imperfect predictions of daily use, supply, evaporation, carriage losses and raw water deliveries. 5) Predicted supply reservoir contents last updated on January 5, 2018. 6) Daily water figures are subject to change.
