

## WATER WATCH REPORT

March 6, 2018

### Supply Reservoir Contents

Reservoir	Capacity		Current Usable Contents (acre-feet)	Percent Full		
	Total (acre-feet)	Usable		Current	Last Year	Historic Median
Antero	19,881	19,826	20,173	102%	75%	99%
Eleven Mile	97,779	97,779	99,521	102%	101%	102%
Cheesman	79,064	79,064	65,471	83%	91%	83%
Marston	19,256	13,133	7,159	55%	47%	53%
Strontia Springs	7,863	7,163	6,475	90%	93%	94%
Chatfield	27,076	10,782	7,206	67%	90%	95%
Dillon	257,304	249,095	233,731	94%	85%	88%
Gross	41,811	29,811	13,518	45%	32%	40%
Ralston	10,776	7,276	5,367	74%	60%	52%
Meadow Creek	5,370	4,520	1,185	26%	0%	12%
<b>Total</b>	<b>566,180</b>	<b>518,449</b>	<b>459,806</b>	<b>89%</b>	<b>84%</b>	<b>80%</b>

Note: The Board has designated 200,000 acre feet of stored water to protect against unforeseen circumstances such as a dam or tunnel failure, a water quality crisis, climate change or catastrophic drought.

March 6, 2018

# Supply Reservoir Contents

Note: The Board has designated 200,000 acre feet of stored water to protect against unforeseen circumstances such as a dam or tunnel failure, a water quality crisis, climate change or catastrophic drought.

March 6, 2018

# March Precipitation

### Cumulative Precipitation: South Platte River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper South Platte diversion facilities.

### Cumulative Precipitation: Colorado River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper Colorado diversion facilities.

### Snowpack: South Platte River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper South Platte diversion facilities.

### Snowpack: Colorado River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper Colorado diversion facilities.

	27	98	97										
	28	111	109										
	29	102											
	30	105											
	31	104											
Monthly Average	104	102	102										103
% of 12-17 Avg. Daily Use	96%	94%	94%										95%

Notes: 1) "AF" denotes acre-feet. "MG" denotes million gallons. 2) Expected Daily Use is based on historical use with normal weather conditions. 3) The predicted end-of-month supply reservoir contents figures assume normal weather after February 1, 2018. 4) The differences between predicted and actual end-of-month supply reservoir contents are the result of imperfect predictions of daily use, supply, evaporation, carriage losses and raw water deliveries. 5) Predicted supply reservoir contents last updated on February 6, 2018. 6) Daily water figures are subject to change.
