

## WATER WATCH REPORT

June 4, 2018

### Supply Reservoir Contents

Reservoir	Capacity (acre-feet)		Current Usable Contents (acre-feet)	Percent Full		
	Total	Usable		Current	Last Year	Historic Median
Antero	19,881	19,826	19,890	100%	92%	100%
Eleven Mile	97,779	97,779	99,280	102%	102%	102%
Cheesman	79,064	79,064	74,331	94%	94%	94%
Marston	19,256	13,133	9,079	69%	92%	78%
Strontia Springs	7,863	7,163	6,299	88%	87%	93%
Chatfield	27,076	10,782	10,740	100%	99%	91%
Dillon	257,304	249,095	251,223	101%	93%	95%
Gross	41,811	29,811	28,648	96%	84%	65%
Ralston	10,776	7,276	4,906	67%	78%	86%
Meadow Creek	5,370	4,520	4,291	95%	50%	45%
<b>Total</b>	<b>566,180</b>	<b>518,449</b>	<b>508,687</b>	<b>98%</b>	<b>94%</b>	<b>89%</b>

### Daily Use

# Supply Reservoir Contents

Note: Denver Water forecasts seasonal reservoir storage contents under dry future weather, normal future weather and wet future weather scenarios.

June 4, 2018

# June Precipitation

### Cumulative Precipitation: South Platte River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper South Platte diversion facilities.

### Cumulative Precipitation: Colorado River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper Colorado diversion facilities.

### Snowpack: South Platte River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper South Platte diversion facilities.

### Snowpack: Colorado River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper Colorado diversion facilities.

Natural Streamflow Volume Forecast							
Most Probable Percent of Average, May through July							
Colorado Basin			South Platte Basin				
Dillon Reservoir	Fraser at Winter Park	Williams Fork Reservoir	Gross Reservoir	Antero Reservoir	Eleven Mile Reservoir	Cheesman Reservoir	Strontia Springs Reservoir
80%	98%	79%	90%	44%	84%	52%	50%

Streamflow forecasts provided by the Natural Resource Conservation Service, Colorado Basin River Forecast Center and Missouri Basin River Forecast Center.

### Cheesman Reservoir Natural Inflow

### Dillon Reservoir Natural Inflow

% of 12-17 Avg. Daily Use	95%	94%	95%	99%	119%	110%	103%						

Notes: 1) "AF" denotes acre-feet. "MG" denotes million gallons. 2) Expected Daily Use is based on historical use with normal weather conditions. 3) The predicted end-of-month supply reservoir contents figures assume normal weather after May 1, 2018. 4) The differences between predicted and actual end-of-month supply reservoir contents are the result of normal estimation error of daily use, supply, evaporation, carriage losses and raw water deliveries. 5) Predicted supply reservoir contents last updated on May 7, 2018. 6) Daily water figures are subject to change.
