

WATER WATCH REPORT

July 2, 2018

Supply Reservoir Contents

Reservoir	Capacity		Current Usable Contents (acre-feet)	Percent Full		
	Total (acre-feet)	Usable		Current	Last Year	Historic Median
Antero	19,881	19,826	19,476	98%	99%	100%
Eleven Mile	97,779	97,779	99,246	102%	102%	102%
Cheesman	79,064	79,064	76,709	97%	100%	93%
Marston	19,256	13,133	8,427	64%	91%	78%
Strontia Springs	7,863	7,163	6,060	85%	95%	93%
Chatfield	27,076	10,782	8,976	83%	85%	93%
Dillon	257,304	249,095	243,154	98%	101%	94%
Gross	41,811	29,811	28,920	97%	99%	60%
Ralston	10,776	7,276	6,796	93%	94%	85%
Meadow Creek	5,370	4,520	4,242	94%	80%	38%
Total	566,180	518,449	502,005	97%	100%	88%

Supply Reservoir Contents

Note: Denver Water forecasts seasonal reservoir storage contents under dry future weather, normal future weather and wet future weather scenarios.

July 2, 2018

June Precipitation

Cumulative Precipitation: South Platte River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper South Platte diversion facilities.

Cumulative Precipitation: Colorado River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper Colorado diversion facilities.

Natural Streamflow Volume Forecast Most Probable Percent of Average, May through July							
Colorado Basin Locations			South Platte Basin Locations				
Dillon Reservoir	Fraser at Winter Park	Williams Fork Reservoir	Gross Reservoir	Antero Reservoir	Eleven Mile Reservoir	Cheesman Reservoir	Strontia Springs Reservoir
83%	98%	85%	79%	44%	69%	62%	55%

Streamflow forecasts provided by the Natural Resource Conservation Service, Colorado Basin River Forecast Center and Missouri Basin River Forecast Center.

Cheesman Reservoir Natural Inflow

Dillon Reservoir Natural Inflow

2018 Water Use and Weather Conditions

- Precipitation Event - Metro Avg.
 - Water Use*
 - - - Daily High Temperature*
 - Long-Term Avg. Daily High Temperature*
- * Rolling 5-Day Avg.

Monthly Average	104	102	103	125	198	314	326						159
% of 12-17 Avg. Daily Use	95%	94%	95%	99%	119%	120%	111%						108%

Notes: 1) "AF" denotes acre-feet. "MG" denotes million gallons. 2) Expected Daily Use is based on historical use with normal weather conditions. 3) The predicted end-of-month supply reservoir contents figures assume normal weather after June 1, 2018. 4) The differences between predicted and actual end-of-month supply reservoir contents are the result of normal estimation error of daily use, supply, evaporation, carriage losses and raw water deliveries. 5) Predicted supply reservoir contents last updated on June 8, 2018. 6) Daily water figures are subject to change.
