As a result of the denial, Denver Water is now under a compliance schedule to implement orthophosphate corrosion control in its distribution system by March 2020.

## RECORD OF PROCEEDINGS

---

Other interested parties, including the Metro Wastewater Reclamation District, the City of Aurora, and the Greenway Foundation filed a request for adjudicatory hearing. That request was denied. These parties also simultaneously, with their request for an adjudicatory hearing, filed a lawsuit in Denver District Court requesting a declaratory judgment of their rights and obligations under certain state and federal statutes and health department regulations. Denver Water has now joined in that lawsuit. A request has been filed to stay any action in the legal proceeding for a 90-day period to allow the parties time to negotiate and see if they can arrive at a compromise settlement that is acceptable to everyone and that will be more protective of the environment and water quality throughout the metropolitan area as a whole.

(b) **Lead and Copper Exceedance**. Denver Water tested various sites in both Southwest and Platte Canyon for lead in the distribution system. Recently, there was a test in Platte Canyon where two of three sites tested exceeded appropriate levels. Denver Water is in the process of re-sampling. A notice of the exceedance was sent to Platte Canyon by mail.

(c) **Valley Sanitation District**. The Valley Sanitation District, utilizing Platte Canyon staff, is approximately three weeks away from submitting plans to the Colorado Department of Public Health & Environment for the Valley interceptor relocation project. Platte Canyon staff is currently working to acquire certain easements that will be needed for the project.

(d) **Scott J. Morse Pump Station Improvement Project**. The installation of the pumps in the pump station is going well and is expected to be completed on or about June 12, 2018.

The installation of the fence and other improvements at the material storage facility adjacent to the Scott J. Morse Pump Station property is working its way through the approval process with the Jefferson County Planning and Zoning Department. Platte Canyon staff will hold one or two meetings at the site in the very near future to advise neighbors surrounding the site as to what Platte Canyon intends to do, especially with respect to the fence and material storage facility that will be constructed.

6. **Operations and Maintenance Summary Report**. Scott Hand reviewed the Operations and Maintenance Summary Report dated April 2018. During the April 2018 reporting period, neither Platte Canyon nor Southwest had any sanitary sewer service interruptions. Southwest had no water service interruptions, but Platte Canyon had one interruption that occurred on April 29, 2018 at 7468 South Teller Street. In

addition, there was also a water main break at 5625 West Canyon Avenue in Columbine Hills. Mr. Hand presented an overview of the repair activities that were undertaken with respect to both of these breaks.

(a) **Remedial Water Repairs.** The Platte Canyon and Southwest 2018 remedial water repairs continue. The restoration of various valves and hydrants in both Platte Canyon and Southwest have been completed. C&L Water Solutions, Inc. and Platte Canyon staff are currently working on the replacement of two broken gate valves in West Bowles Avenue west of Simms Street in Southwest. These repairs are challenging due to traffic control considerations. It is anticipated that the broken gate valve repairs will be completed before the end of May 2018.
