(a) **Valley Interceptor Relocation Project.** The final plans and specifications for the Valley Interceptor Relocation Project have been submitted to the Colorado Department of Public Health and Environment for review and approval. Assuming a timely turnaround time, the project is scheduled to go to bid on January 7, 2019 with the expectations that bids will be received the first week of February. Easement acquisition for the project is proceeding smoothly. Easements from two of the three private property owners have been obtained and work continues on the acquisition of the Easements required from the City of Englewood.
Staff is negotiating with Francis Kent regarding the installation of new lift stations on his property to serve specific buildings. Legal counsel is drafting an agreement that will be presented to Mr. Kent for his review in the very near future.

(b) **Colorado Department of Public Health Regulation 22.** Regulation 22 is important to Platte Canyon and Southwest because it requires the submittal of the plans and specifications for large interceptor and lift station projects to the State for review and approval. The interceptor and lift station work group which is involved in providing revisions to this Regulation last met on October 29, 2018.

The effort of the work group and the Colorado Department of Public Health and Environment at this point in time is to adopt meaningful modifications to Regulation 22 dealing with site location and design approval regulations for domestic wastewater treatment works. As mentioned above, this Regulation establishes design guidelines for wastewater interceptors and lift stations. It is hoped that as a result of the revisions the process for obtaining approval of these types of facilities through the State can be streamlined.

(c) **Colorado Department of Public Health and Environment Decision on Corrosion Control Affecting Denver Water.** Cynthia Lane reported that the wastewater and watershed stakeholder group organized to help quantify the potential impacts of the Health Department’s decision requiring Denver Water to use orthophosphate as a means of controlling corrosion in Denver Water’s Distribution System continues to meet. During the most recent meeting of the work group various items were discussed, including obtaining detailed cost estimates from two major entities, the Metro Wastewater Reclamation District and the South Platte Renewal Partnership. The group also discussed obtaining a watershed model for the Barr Milton Watershed to help analyze the impacts of orthophosphate discharges from wastewater treatment plants and non-point source loadings on the nutrient levels in streams and in reservoirs. The stakeholder group is hoping to wind down the process sometime in mid-January 2019. Platte Canyon staff remain engaged in the stakeholder process to better evaluate the potential impacts to both Platte Canyon and Southwest, its customers and the surrounding water community.

(d) **Platte Canyon and Southwest Websites.** There was a brief discussion concerning the Platte Canyon and Southwest websites, and in particular the Board Member portals used by each District. Staff wanted to know what each Board liked about their respective portals and what could be done to improve those portals. Feedback was provided to staff, and Tayler Newkirk will proceed making the requested revisions.
Alyssa Quinn noted that in the future the District plans to deliver Board Member packets using a Windows-based system that is more functional than the current system. Alyssa is involved in converting from the current system to a Windows Surface Go Pro platform.

6. Operations and Maintenance Summary Report. Scott Hand reviewed the Operations and Maintenance Summary Report dated October 2018. During the October 2018 reporting period, neither Platte Canyon nor Southwest had any sanitary sewer service interruptions. Platte Canyon had no water service interruptions. Southwest experienced two water service interruptions, one at 6350 South Jellison Street on October 9, 2018, and another at 6578 S. Everette Way on October 10, 2018. Mr. Hand reviewed these water service interruptions and described the repair activities undertaken to restore water service.

He then discussed a break that occurred on November 23, 2018 on an 8-inch water line in South DePew Street, noting that the cost of repairing this break were significant. He reviewed the repair activities with the Board.

Mr. Hand also discussed the staff training that is ongoing, noting that various staff members attended a one-day re-certification course for pipeline assessment certification. All District-certified operators have been re-certified as is required by health department regulation and statute.

Mr. Hand also noted that in mid-November work commenced by Levi Contractors for installing an additional valve for purposes of performing the Peakview and Wadsworth water main reconstruction. The new valve will be installed to maintain water service to residential properties while the final segment of the 10-inch line in this area is abandoned.

With respect to the flow monitoring instrumentation replacement project, it was noted that during October, Browns Hill acquired all equipment and materials necessary to start work on this project. Work began in early November and the District is now receiving flow monitoring data on a real-time basis.

7. Construction Project Report. Tony Cocozzella reviewed with both Boards the Capital Project Information and Construction Status Report for both Platte Canyon and Southwest. The Report updated the Boards as to the status of all ongoing Platte Canyon and Southwest projects, including developer and District-specific projects. As part of the review, Mr. Cocozzella also addressed those projects that are in the design phase at the present time.
NEW BUSINESS

There was no new business to come before the joint participation portion of the meeting. It was noted that the Boards’ December meeting has been canceled. There was a brief discussion concerning rescheduling the January 2019 meeting, but coordination of all Board members January schedules.
