

## WATER WATCH REPORT

March 25, 2019

### Supply Reservoir Contents

Reservoir	Capacity (acre-feet)		Current Usable Contents (acre-feet)	Percent Full		
	Total	Usable		Current	Last Year	Historic Median
Antero	19,881	19,826	19,347	98%	101%	99%
Eleven Mile	97,779	97,779	99,315	102%	102%	102%
Cheesman	79,064	79,064	62,508	79%	80%	84%
Marston	19,256	13,133	7,524	57%	55%	58%
Strontia Springs	7,863	7,163	6,156	86%	88%	94%
Chatfield	27,076	10,782	10,740	100%	76%	96%
Dillon	257,304	249,095	173,968	70%	93%	87%
Gross	41,811	29,811	8,303	28%	45%	34%
Ralston	10,776	7,276	4,877	67%	49%	53%
Meadow Creek	5,370	4,520	0	0%	26%	12%
<b>Total</b>	<b>566,180</b>	<b>518,449</b>	<b>392,737</b>	<b>76%</b>	<b>88%</b>	<b>79%</b>

### Daily Use

# Supply Reservoir Contents

Note: Denver Water forecasts seasonal reservoir storage contents under dry future weather, normal future weather and wet future weather scenarios.

March 25, 2019

# March Precipitation

### Cumulative Precipitation: South Platte River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper South Platte diversion facilities.

### Cumulative Precipitation: Colorado River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper Colorado diversion facilities.

### Snowpack: South Platte River Watershed

Data are from the 7 Snotel stations above Denver Water's Upper South Platte diversion facilities.

### Snowpack: Colorado River Watershed

Data are from the 7 Snotel stations above Denver Water's Upper Colorado diversion facilities.

## March 1st Forecasted April-July Natural Runoff Volume

\* Runoff forecasts are updated monthly on the 1st, so these numbers do not reflect precipitation that occurs later in the month.

March 25, 2019

Denver Water Use and Reservoir Contents 2019													
	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	YTD-Avg
Predicted End-of-Month Supply Reservoir Contents (Full = 518,449 AF)	394,400												
Actual End-of-Month Supply Reservoir Contents (AF)	397,696	393,994											
Actual % Full	76%	76%											
Historical Median % Full	80%	80%											
14-'18 Avg. Daily Use (MG)	109	109	107	126	171	270	296	280	246	149	108	105	108
Actual Daily Use (MG)	1	102	111	101

	30	107											
	31	110											
Monthly Average	108	110	105										108
% of '14-'18 Avg. Daily Use	99%	101%	98%										100%

Notes: 1) "AF" denotes acre-feet. "MG" denotes million gallons. 2) Expected Daily Use is based on historical use with normal weather conditions. 3) The predicted end-of-month supply reservoir contents figures assume normal weather after February 1, 2019. 4) The differences between predicted and actual end-of-month supply reservoir contents are the result of normal estimation error of daily use, supply, evaporation, carriage losses and raw water deliveries. 5) Predicted supply reservoir contents last updated on March 11, 2019. 6) Daily water figures are subject to change.

# Lake Powell Report\*

Data are from the 115 SNOTEL stations above Lake Powell located in Colorado, Utah and Wyoming.

\* Denver Water gets half of its water supply from the Colorado River and closely monitors conditions at Lake Powell and within the greater Colorado River Basin.
