

DENVER WATER

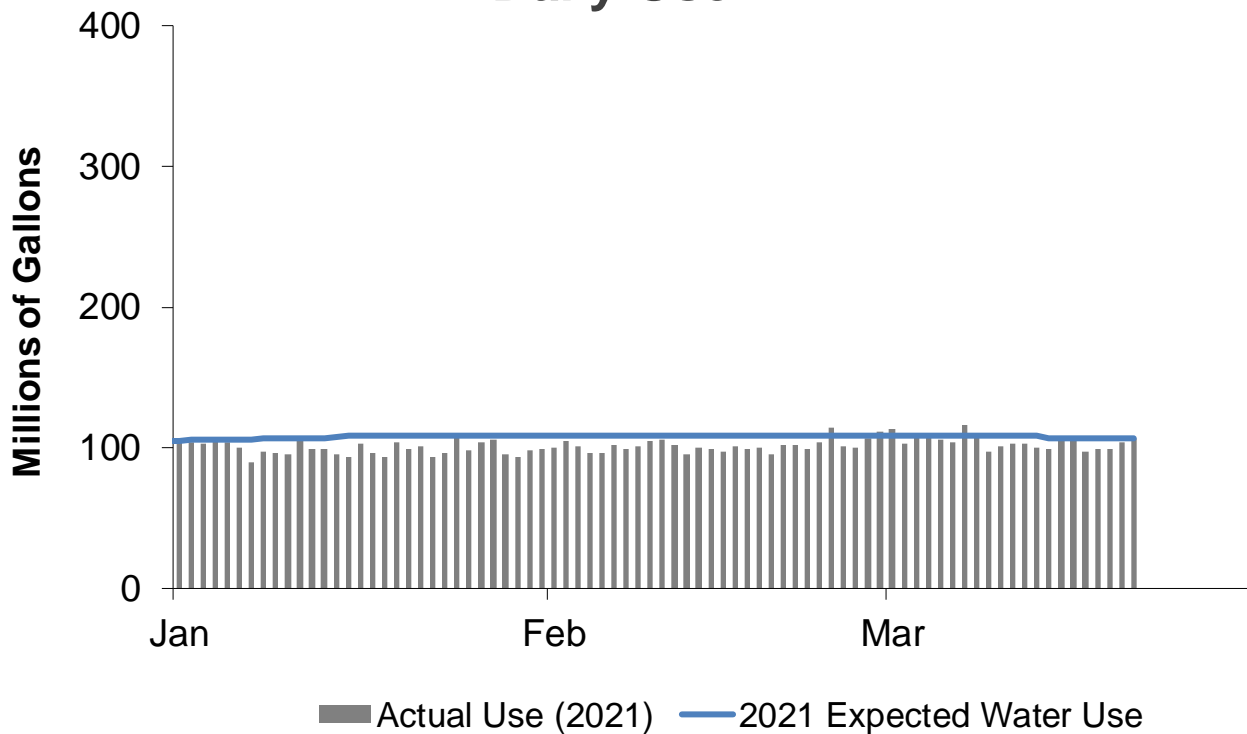

WATER WATCH REPORT

March 22, 2021

Supply Reservoir Contents

Reservoir	Capacity		Current Usable Contents (acre-feet)	Percent Full		
	(acre-feet)			Last Year	Historical Median	
	Total	Usable	Current			
Antero	19,881	19,826	19,390	98%	101%	99%
Eleven Mile	97,779	97,779	94,559	97%	103%	102%
Cheesman	79,064	79,064	49,128	62%	68%	84%
Marston	19,256	13,133	10,032	76%	52%	57%
Strontia Springs	7,863	7,163	6,138	86%	90%	94%
Chatfield	27,076	10,782	7,024	65%	84%	96%
Dillon	257,304	249,095	195,059	78%	90%	87%
Gross	41,811	29,811	8,156	27%	48%	35%
Ralston	10,776	7,276	5,070	70%	58%	53%
Meadow Creek	5,370	4,520	1,233	27%	0%	12%
Total	566,180	518,449	395,790	76%	85%	79%

Daily Use

Supply Reservoir Contents

* The dry scenario represents the 90% exceedance level meaning 90% of the forecasted scenarios are above this level. The wet scenario represents the 10% exceedance level meaning 10% of the forecasted scenarios are above this level. The normal or most probable scenario represents the 50% exceedance level where 50% of the forecasts fall above and 50% of the forecasts fall below this level.

March 22, 2021

March Precipitation

Cumulative Precipitation: South Platte River Watershed

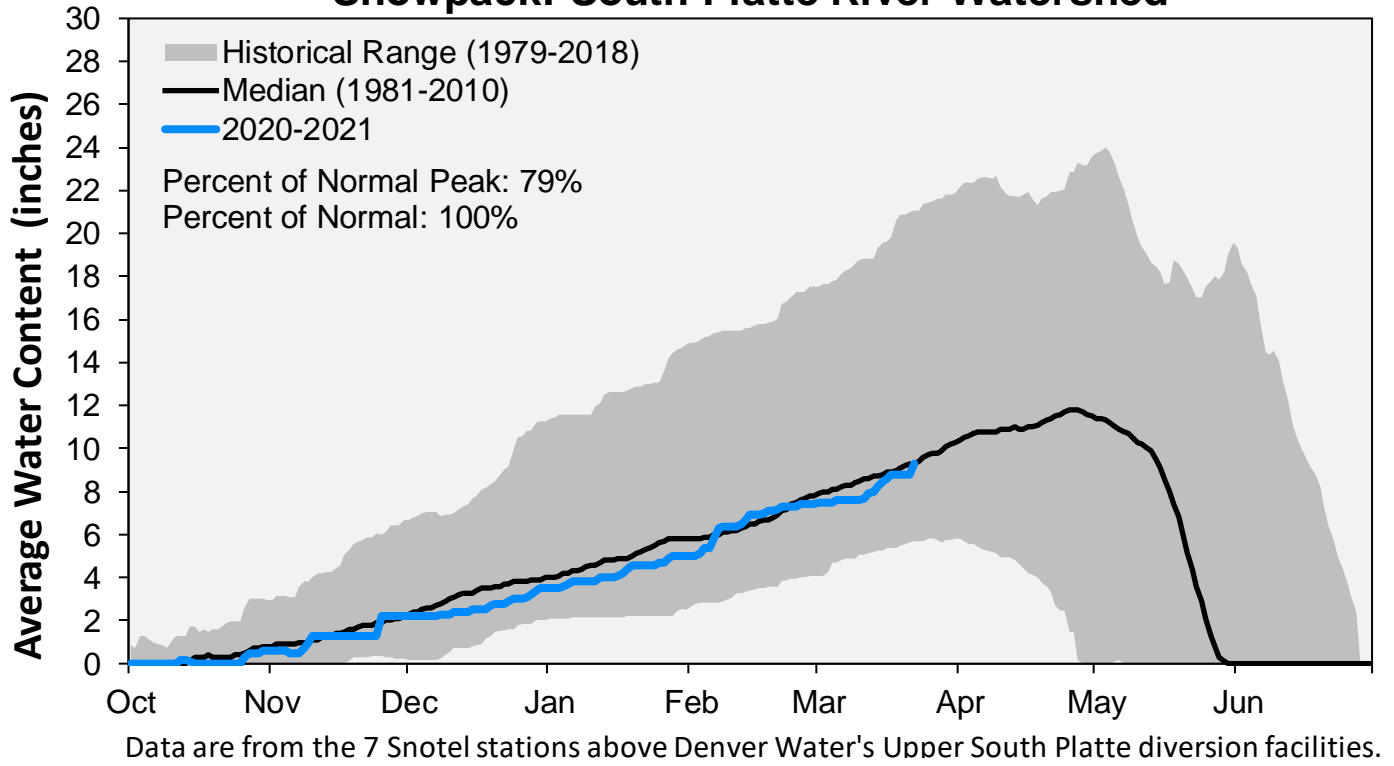

Data are from the 7 SNOTEL stations above Denver Water's Upper South Platte diversion facilities.

Cumulative Precipitation: Colorado River Watershed

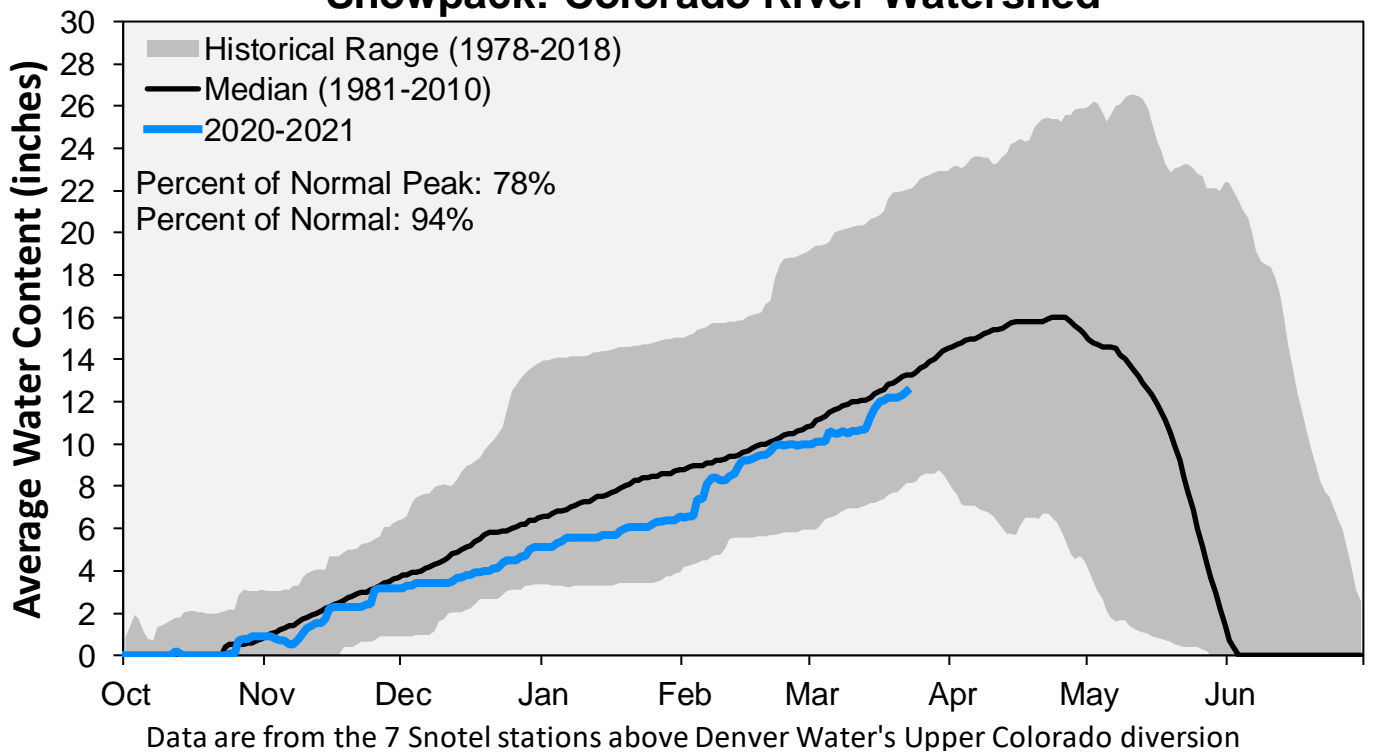

Data are from the 7 SNOTEL stations above Denver Water's Upper Colorado diversion facilities.

Snowpack: South Platte River Watershed

Snowpack: Colorado River Watershed

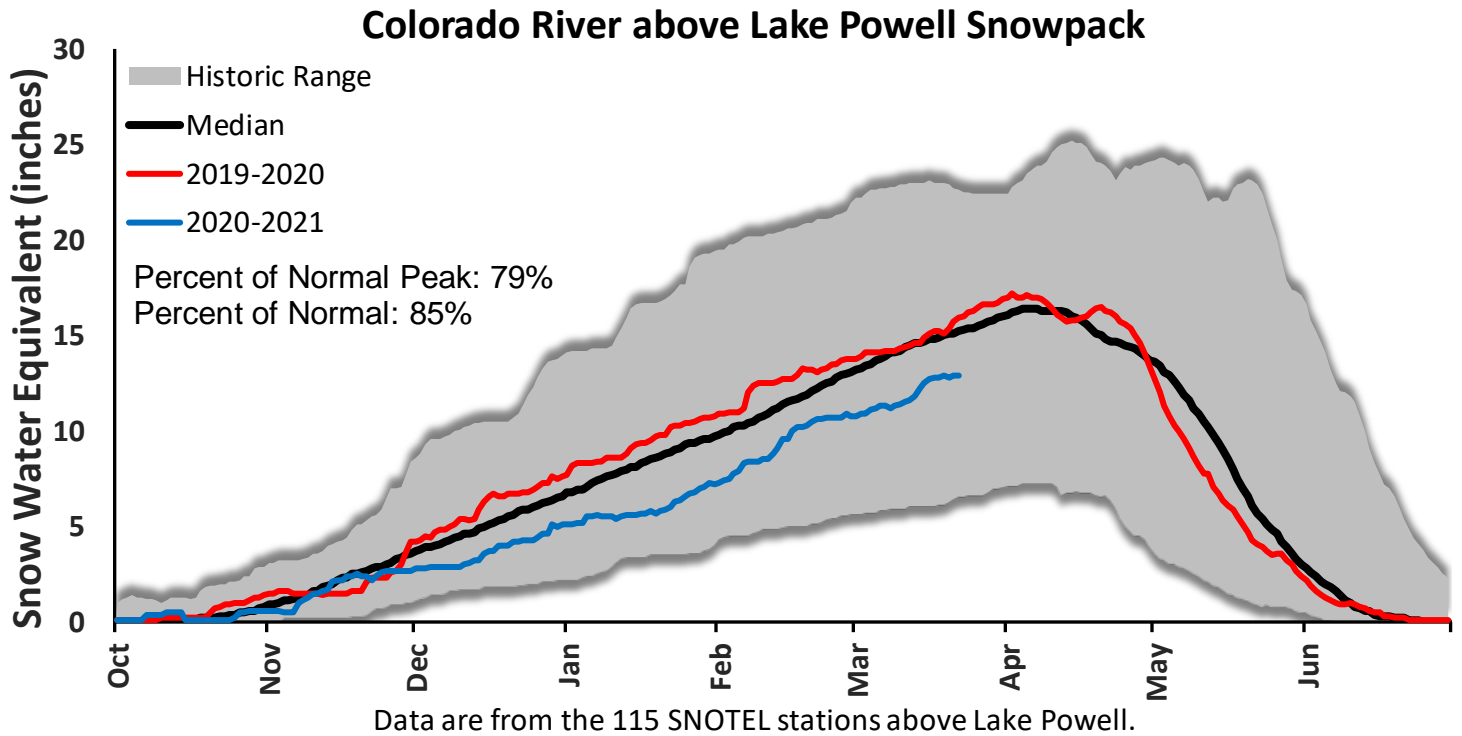

March 22, 2021

Denver Water Use and Reservoir Contents 2021													
	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	YTD-Avg
Predicted End-of-Month Supply Reservoir Contents (Full = 518,449 AF)	398,000												
Actual End-of-Month Supply Reservoir Contents (AF)	402,356	397,848											
Actual % Full	78%	77%											
Historical Median % Full	81%	80%											
2021 Expected Daily Use (MG)	109	109	107	124	161	263	305	298	276	163	110	105	108
Actual Daily Use (MG)	1	95	100	99									
	2	94	97	105									
	3	103	101	107									
	4	97	99	97									
	5	93	100	99									
	6	104	95	99									
	7	99	102	104									
	8	101	102	107									
	9	94	99	101									
	D 10	96	104	100

	29	102											
	30	95											
	31	100											
Monthly Average	100	104	100										101
% of 2020 Expected Daily Use	91%	95%	93%										93%

Notes: 1) "AF" denotes acre-feet. "MG" denotes million gallons. 2) Expected Daily Use is based on historical use with normal weather conditions. 3) The predicted end-of-month supply reservoir contents figures assume normal weather after January 1, 2021. 4) The differences between predicted and actual end-of-month supply reservoir contents are the result of normal estimation error of daily use, supply, evaporation, carriage losses and raw water deliveries. 5) Predicted supply reservoir contents last updated on March 8, 2021. 6) Daily water figures are subject to change.

Lake Powell Report*

* Denver Water gets half of its water supply from the Colorado River and closely monitors conditions at Lake Powell and within the greater Colorado River Basin.
