

WATER WATCH REPORT

February 7, 2022

Supply Reservoir Contents

| Reservoir | Capacity (acre-feet) | | Current Usable Contents (acre-feet) | Percent Full | | |
|------------------|----------------------|----------------|-------------------------------------|--------------|------------|-------------------|
| | Total | Usable | | Current | Last Year | Historical Median |
| Antero | 20,122 | 20,067 | 19,955 | 99% | 96% | 99% |
| Eleven Mile | 97,779 | 97,779 | 99,040 | 101% | 97% | 102% |
| Cheesman | 79,064 | 79,064 | 64,858 | 82% | 56% | 83% |
| Marston | 19,108 | 13,133 | 9,508 | 72% | 67% | 54% |
| Strontia Springs | 7,863 | 7,163 | 6,518 | 91% | 84% | 93% |
| Chatfield | 27,076 | 10,782 | 9,719 | 90% | 67% | 92% |
| Dillon | 257,304 | 249,095 | 191,532 | 77% | 82% | 90% |
| Gross | 41,811 | 29,811 | 21,012 | 70% | 39% | 48% |
| Ralston | 10,776 | 7,276 | - | 0% | 61% | 57% |
| Meadow Creek | 5,370 | 4,520 | 3,043 | 67% | 27% | 12% |
| Total | 566,273 | 518,690 | 425,186 | 82% | 77% | 81% |

Daily Use

Supply Reservoir Contents

Note: Denver Water forecasts seasonal reservoir storage contents under dry future weather, normal future weather and wet future weather scenarios.

February 7, 2022

February Precipitation

Snowpack: South Platte River Watershed

Data are from the 7 Snotel stations above Denver Water's Upper South Platte diversion

Snowpack: Colorado River Watershed

Data are from the 7 Snotel stations above Denver Water's Upper Colorado diversion

Cumulative Precipitation: South Platte River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper South Platte diversion facilities.

Cumulative Precipitation: Colorado River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper Colorado diversion facilities.

February 7, 2022

| Denver Water Use and Reservoir Contents 2022 | | | | | | | | | | | | | |
|--|---------|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|---------|
| | Jan | Feb | Mar | Apr | May | Jun | Jul | Aug | Sep | Oct | Nov | Dec | YTD-Avg |
| Predicted End-of-Month Supply Reservoir Contents (Full = 518,449 AF) | 419,700 | | | | | | | | | | | | |
| Actual End-of-Month Supply Reservoir Contents (AF) | 425,595 | | | | | | | | | | | | |
| Actual % Full | 82% | | | | | | | | | | | | |
| Historical Median % Full | 81% | 80% | 79% | 79% | 88% | 98% | 95% | 92% | 88% | 85% | 84% | 83% | |
| 2022 Expected Daily Use (MG) | 105 | 104 | 102 | 120 | 157 | 257 | 298 | 292 | 270 | 158 | 105 | 101 | 105 |
| Actual Daily Use (MG) | 1 | 92 | 98 | | | | | | | | | | |
| | 2 | 100 | 95 | | | | | | | | | | |
| | 3 | 100 | 100 | | | | | | | | | | |
| | 4 | 105 | 105 | | | | | | | | | | |
| | 5 | 99 | 97 | | | | | | | | | | |
| | 6 | 101 | 103 | | | | | | | | | | |
| | 7 | 100 | | | | | | | | | | | |

| | 30 | 102 | | | | | | | | | | | |
| | 31 | 91 | | | | | | | | | | | |
| Monthly Average | 99 | 100 | | | | | | | | | | | 99 |
| % of 2022 Expected Daily Use | 94% | 96% | | | | | | | | | | | 94% |

Notes: 1) "AF" denotes acre-feet. "MG" denotes million gallons. 2) Expected Daily Use is based on historical use with normal weather conditions. 3) The predicted end-of-month supply reservoir contents figures assume normal weather after February 7th, 2022. 4) The differences between predicted and actual end-of-month supply reservoir contents are the result of normal estimation error of daily use, supply, evaporation, carriage losses and raw water deliveries. 5) Predicted supply reservoir contents last updated on February 7th, 2022. 6) Daily water figures are subject to change.

Lake Powell Report*

Lake Powell Elevation (2001-Current)

Colorado River above Lake Powell Snowpack

Data are from the 115 SNOTEL stations above Lake Powell.

* Denver Water gets half of its water supply from the Colorado River and closely monitors conditions at Lake Powell and within the greater Colorado River Basin.
