

WATER WATCH REPORT

March 7, 2022

Supply Reservoir Contents

Reservoir	Capacity (acre-feet)		Current Usable Contents (acre-feet)	Percent Full		
	Total	Usable		Current	Last Year	Historical Median
Antero	20,122	20,067	19,890	99%	96%	99%
Eleven Mile	97,779	97,779	99,212	101%	96%	102%
Cheesman	79,064	79,064	60,871	77%	60%	83%
Marston	19,108	13,133	8,539	65%	63%	53%
Strontia Springs	7,863	7,163	6,251	87%	90%	94%
Chatfield	27,076	10,782	10,451	97%	66%	95%
Dillon	257,304	249,095	191,376	77%	79%	88%
Gross	41,811	29,811	21,406	72%	34%	39%
Ralston	10,776	7,276	-	0%	59%	52%
Meadow Creek	5,370	4,520	3,043	67%	27%	12%
Total	566,273	518,690	421,039	81%	76%	80%

Daily Use

Supply Reservoir Contents

Acre-Feet

Note: Denver Water forecasts seasonal reservoir storage contents under dry future weather, normal future weather and wet future weather scenarios.

March 7, 2022

March Precipitation

Snowpack: South Platte River Watershed

Data are from the 7 Snotel stations above Denver Water's Upper South Platte diversion

Snowpack: Colorado River Watershed

Data are from the 7 Snotel stations above Denver Water's Upper Colorado diversion

Cumulative Precipitation: South Platte River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper South Platte diversion facilities.

Cumulative Precipitation: Colorado River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper Colorado diversion facilities.

March 7, 2022

Denver Water Use and Reservoir Contents 2022													
	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	YTD-Avg
Predicted End-of-Month Supply Reservoir Contents (Full = 518,449 AF)	416,800												
Actual End-of-Month Supply Reservoir Contents (AF)	425,595	421,903											
Actual % Full	82%	81%											
Historical Median % Full	81%	80%	79%	79%	88%	98%	95%	92%	88%	85%	84%	83%	
2022 Expected Daily Use (MG)	105	104	102	120	157	257	298	292	270	158	105	101	104
Actual Daily Use (MG)	1	92	98	102									
	2	100	95	101									
	3	100	100	101									
	4	105	105	100									
	5	99	97	95

	29	96											
	30	102											
	31	91											
Monthly Average	99	101	100										100
% of 2022 Expected Daily Use	94%	97%	98%										96%

Notes: 1) "AF" denotes acre-feet. "MG" denotes million gallons. 2) Expected Daily Use is based on historical use with normal weather conditions. 3) The predicted end-of-month supply reservoir contents figures assume normal weather after March 7th, 2022. 4) The differences between predicted and actual end-of-month supply reservoir contents are the result of normal estimation error of daily use, supply, evaporation, carriage losses and raw water deliveries. 5) Predicted supply reservoir contents last updated on March 7th, 2022. 6) Daily water figures are subject to change.

Lake Powell Report*

Lake Powell Elevation (2001-Current)

Colorado River above Lake Powell Snowpack

Data are from the 115 SNOTEL stations above Lake Powell.

* Denver Water gets half of its water supply from the Colorado River and closely monitors conditions at Lake Powell and within the greater Colorado River Basin.
