The regular joint monthly meeting of the Board of Directors of the Southwest Metropolitan Water and Sanitation District (“Southwest”) and the Board of Directors of the Platte Canyon Water and Sanitation District (“Platte Canyon”) convened on Friday, March 25, 2022, at 8:30 a.m. in the Districts’ office located at 8739 West Coal Mine Avenue, Littleton, Colorado 80123. Due to COVID-19 and related virus concerns, the meeting was also conducted virtually using Microsoft Teams Meeting. Accordingly, those Board members who could not or were not comfortable physically attending, could attend by telephone or by on-line virtual meeting. The web address and call-in information were included in the meeting notice so that interested members of the public could also attend. Although jointly conducted, a portion of the meeting pertained solely to one District or the other and, accordingly, at times only the vote of one Board or the other was required.

The following Southwest Directors were physically in attendance, to-wit:

Anthony M. Dursey  
George E. Hamblin, Jr.  
Chuck Hause  
Bernard J. Sebastian, Jr.

The following Platte Canyon Directors were physically in attendance, to wit:

William D. Buckner  
Anthony M. Dursey  
Louis J. Fohn  
George E. Hamblin, Jr.  
Mark Swatek

The following Platte Canyon staff members were physically in attendance: Cynthia Lane, manager; Alyssa Quinn, assistant manager; Vanessa Shiple,

1 and each District’s Water and Sanitary Sewer Activity Enterprise.
Scott Hand, operations supervisor; and Tony Cocozzella, construction program manager, and Bridget Butterfield, communications and administrative services coordinator attended by Microsoft Teams.²

Also physically in attendance was Timothy J. Flynn, from Collins Cole Flynn Winn & Ulmer, PLLC, legal counsel for both Districts.

**SOUTHWEST CONTINUED VARIANCE HEARING**

Before calling the Southwest meeting to order, Anthony M. Dursey, Southwest’s President, reopened the Southwest Variance Hearing on Toll Brothers’ appeal of Southwest staff’s denial of Toll Brothers’ request for a variance from Southwest’s sanitary sewer specifications as applied to the Parkvue on the Platte Subdivision within the South Santa Fe Park development on South Santa Fe Drive.

Cynthia Lane, Southwest’s manager, advised the Southwest Board that during the month, Southwest staff and Toll Brothers staff had met to discuss modifications to the sewer plans for the Parkvue on the Platte development as originally submitted by Toll Brothers. The goal is to come up with a set of plans that will meet Southwest’s sanitary sewer specifications and allow for development of the property without substantial modification to the topography of the land as it currently exists.

Toll Brothers’ engineers are still in the process of working on those revised plans. Cynthia Lane advised the Southwest Board that for that reason the variance hearing needed to be continued for another month so that Toll Brothers can finalize their redesign plans in the hopes that Southwest and Toll Brothers could develop a mutually acceptable solution.

After Cynthia Lane’s introductory remarks, the Southwest President, Anthony M. Dursey continued the hearing on Toll Brothers’ variance request until 8:30 a.m. on Friday, April 22, 2022, which is the April meeting date for both Platte Canyon and Southwest.

**EXECUTIVE SESSION**

Because of the Toll Brothers’ variance hearing was continued for another month, the Executive Session noticed on the agenda was not held.

**CALL TO ORDER**

The Southwest meeting was called to order by Southwest President, Anthony M. Dursey, who presided as Chair.

The average yield on Southwest’s investments for the month of February 2022, as calculated by staff, was 0.6402% per annum.

2. **Management Report.** The Board briefly reviewed a written management report for the month of February 2022, a copy of which was previously provided to each member of both Boards. Her review consisted of an update as to the following items:

(a) **2022 District Goals.** The manager reported that she and the staff are on schedule for accomplishing the goals set by the Platte Canyon Board in consultation with the Southwest Board for the manager for 2022. The schedule for the six goals listed in the management report was reviewed. It was noted that all goals are on schedule except for the implementation of a consistent and transparent performance evaluation system for staff. Progress on this goal is behind schedule due to the manager’s absence from work for medical reasons during a portion of the month of March. However, efforts to establish and implement a performance evaluation system will begin this month, as soon as practical following the Board meeting.

(b) **Safety Report for 2022 as of March 15, 2022.** The Boards reviewed a table set-forth in the management report that provides a safety metrics status report. Any security or IT incidents will be reported in the IT section of the management report. It was noted that there have been no lost time incidents except for the incident that occurred in November of 2021, which happened in connection with the water line break that occurred on West Bowles Avenue and South Wadsworth Boulevard, when a large pipe was hit by an underground boring contractor. The nature and extent of the injury that an employee suffered was briefly reviewed. The Board and the manager discussed ways to incentivize employees to not only understand the safety aspects of their jobs, but to become actively involved in implementing safety protocols. Several training sessions, provided for free by the District’s insurance carrier, have been scheduled and are currently being held with staff.

(c) **Update on Hogback Pump Station Maintenance.** The manager briefly reported that the scheduled maintenance on the Hogback Pump Station went very well. After providing a brief introduction, this portion of the management report was handled by Scott Hand, who noted that all eight valves in the Hogback Pump Station have been completely fixed. Denver Water coordinated well with staff for the Pump Station maintenance. Denver Water had six people on site, including a supervisor and load control kept the Denver Water Board Tank just West of the Hogback Pump Station at a level sufficient to keep pressure up on the District’s distribution system. It was noted that there is one discharge header that still requires repair because the published specification for that header was different than what was found in the Pump Station. As a result, repair to the discharge header and the valve associated therewith will have to be done at a later time, but it will not be a significant maintenance operation and can be scheduled when all parts and personnel are available.

(d) **Discussion Regarding Capital Infrastructure Funding Going Forward.** The manager then opened a discussion with the Boards regarding the philosophy of and methods for funding future capital infrastructure. It was noted that there are significant funds that are being made available to the State for this type of capital
improvement work from the federal government. Low interest, no interest, or principal forgiveness loans most likely will be available to both Platte Canyon and Southwest through the Colorado Water Resource Power and Development Authority, which is the entity that administers the State Revolving Fund for these types of projects. The discussion was for the purpose of determining if the Boards wanted to modify their current policy, which is to cash fund all capital improvements.

It was noted that Platte Canyon’s infrastructure is in greater need of immediate rehabilitation as compared to that of Southwest. At the end of the discussion, staff was asked to analyze and determine the cost of the capital improvements that are currently anticipated as well as the cost associated with financing via debt verses cash funding those improvements at the present time. Director Dursey also asked staff to analyze the impact on the District of spending down each District’s reserves in order to fund certain cash projects at the present time without having to borrow funds. The advantages and disadvantages of using the Colorado State Revolving Fund were also discussed.

At the end of the discussion, it was determined that staff will bring back additional information for the Boards for further analysis, and discussion at either the April or May meeting. If the either District intends to fund a portion or all of its planned capital improvements by the issuance of debt, that District will need to get voter authorization to incur the debt. The next time for placing a debt authorization question before either District’s voters will be November of 2022. If either District intends to have an election in November 2022, it will need to adopt an election resolution no later than July of 2022.

(e) Miscellaneous Matters. With respect to the balance of the managers written report, the manager asked if there were any questions concerning the report. Due to the amount of time spent on the discussion regarding options for funding future capital improvements, the manager elected to forego a detailed review of the report and offered to answer any questions as to specific items. The Board had no questions.

3. Operations and Maintenance Summary Report. Scott Hand reviewed the Operations and Maintenance Summary report for February 2022. He noted that during the reporting period, neither Southwest nor Platte Canyon experienced any sewer service interruptions. Each District, however, experienced one water service interruption. On February 9, 2022, Platte Canyon an 8” AC pipe with a 2” service failed at 7771 West Glasgow Place. The steel tapping saddle deteriorated as a result of electrolysis. A new bronze saddle was installed, and the service was reconnected. On February 8, 2022, Southwest experienced a water line break at 9525 West Coal Mine Avenue on an 8” ductile iron pipe due to electrolysis. The break was difficult to locate and caused a significant amount of asphalt damage. The estimated cost to repair this break is somewhere in the area of $20,000 to $30,000. A PowerPoint presentation on both incidents was presented by Mr. Hand as part of his report.
It was also noted that during the month of February 2022, staff attended a demonstration of a hydraulic valve operator. Staff is currently working to replace the hydraulic valve operating unit that was purchased in 2014.

4. **Capital Projects Report.** Tony Cocozzella reviewed the capital projects report for Platte Canyon and Southwest. As currently, there are thirteen development projects underway. As part of his report, Mr. Cocozzella updated the Boards as to the status of all going Platte Canyon and Southwest projects, including developer projects and District specific projects. His report also gave a budget to actual comparison of the costs incurred by the District in a number of the Districts capital sanitary sewer and water replacement projects that are scheduled for this year.

Ms. Shipley provided a brief overview of the 2021 audit, noting that the auditor’s opinion is unmodified. An unmodified opinion means that in the opinion of Schilling & Company, Platte Canyon’s financial statements for the years ended December 31, 2020, and December 31, 2021, present fairly in all material
