

WATER WATCH REPORT

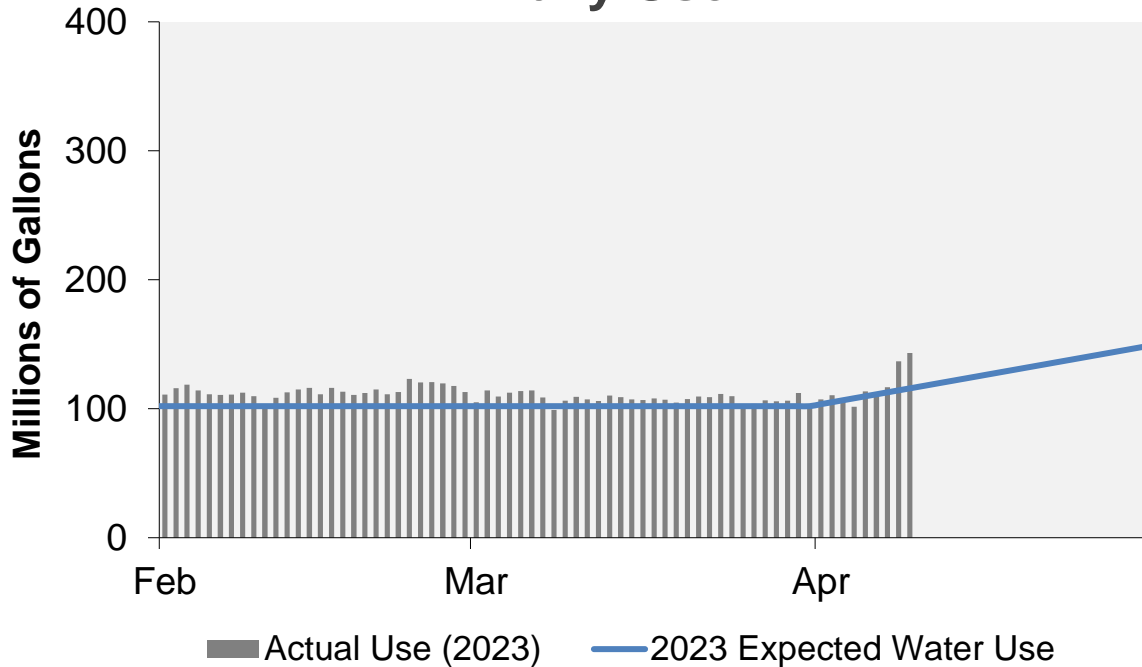

April 10, 2023

Supply Reservoir Contents

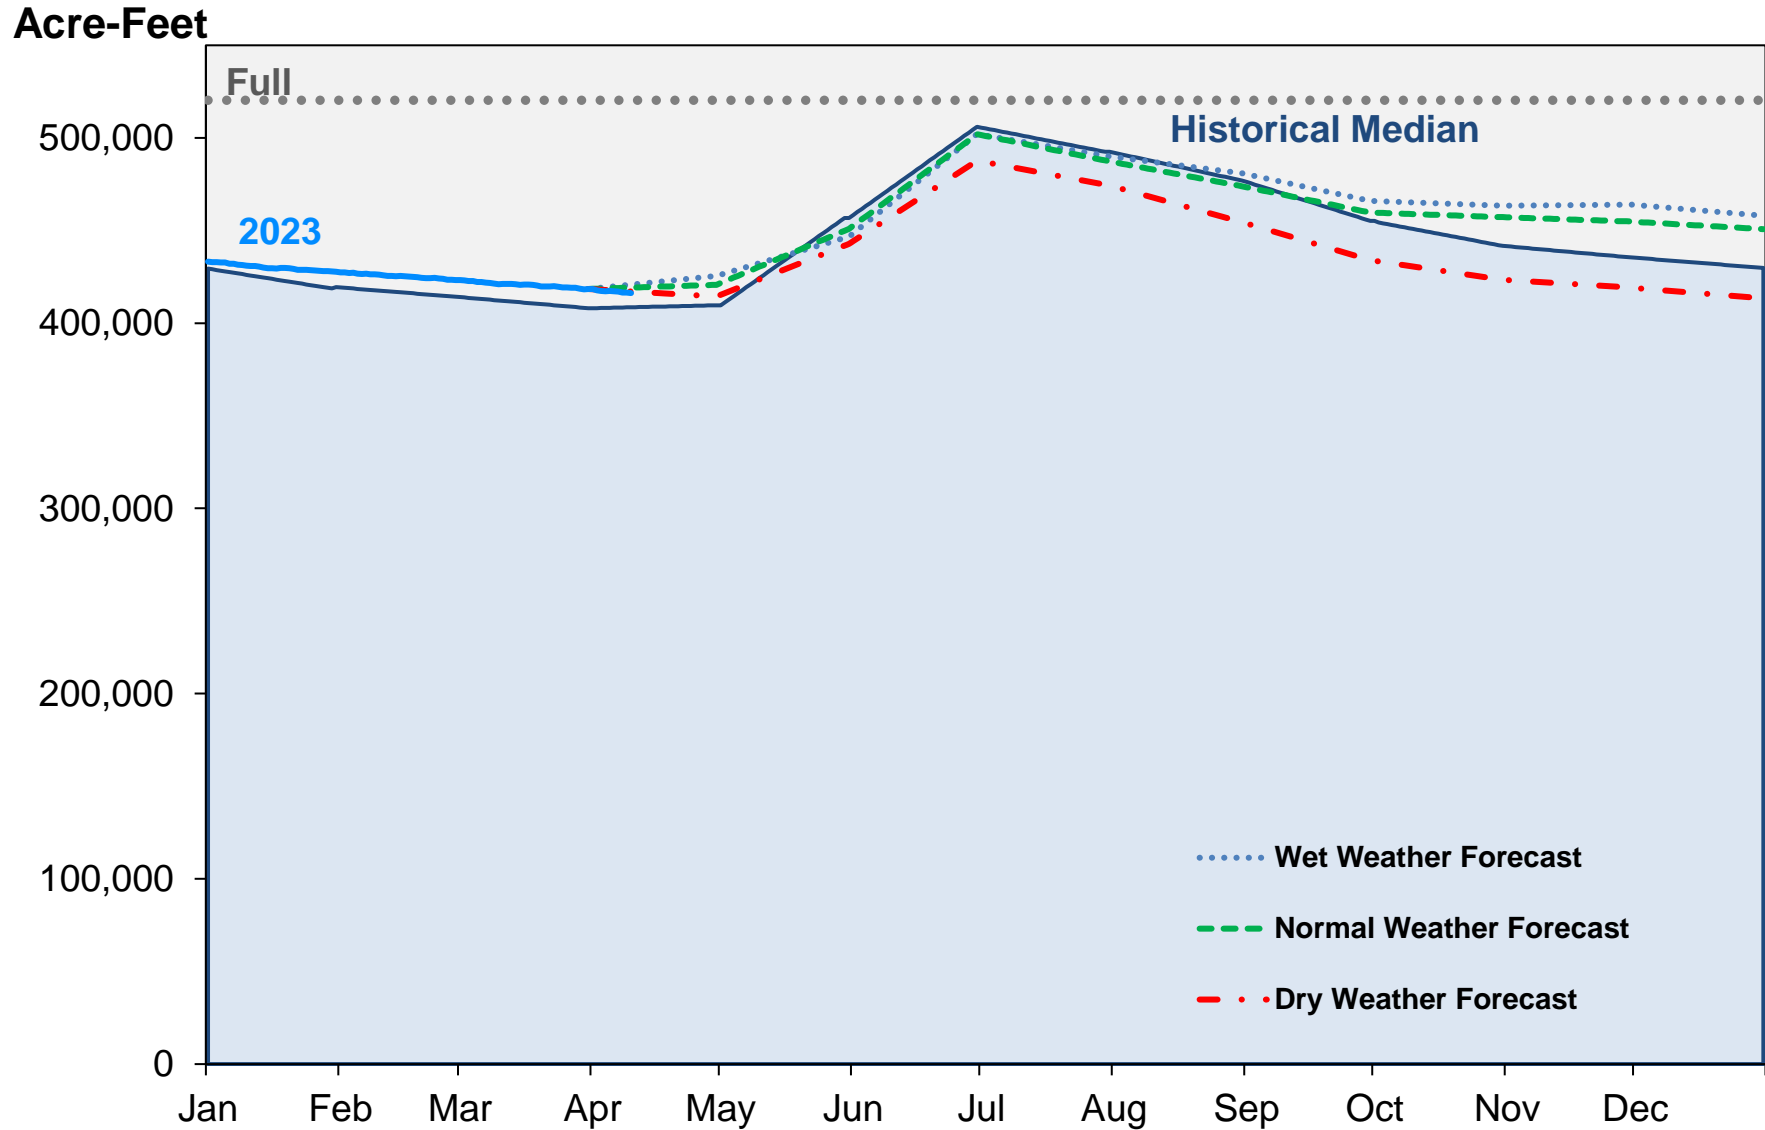

Reservoir	Capacity		Current Usable Contents (acre-feet)	Percent Full		
	(acre-feet)			Current	Last Year	Historical Median
	Total	Usable				
Antero	20,122	20,067	20,173	101%	99%	99%
Eleven Mile	97,779	97,779	99,383	102%	102%	102%
Cheesman	79,064	79,064	63,695	81%	74%	86%
Marston	19,108	13,133	7,091	54%	49%	63%
Strontia Springs	7,863	7,163	6,065	85%	85%	94%
Chatfield	28,709	12,415	11,928	96%	74%	95%
Dillon	257,304	249,095	197,438	79%	77%	86%
Gross*	41,811	29,811	6,458	22%	54%	30%
Ralston	10,776	7,276	4,260	59%	13%	58%
Meadow Creek	5,370	4,520	-	0%	67%	12%
Total	567,906	520,323	416,492	80%	79%	79%

*Gross Reservoir storage is limited to 29,938 acre feet in total storage during construction activities. The percent full figures are based on the normal usable capacity of 29,811 acre feet.

Daily Use

Supply Reservoir Contents

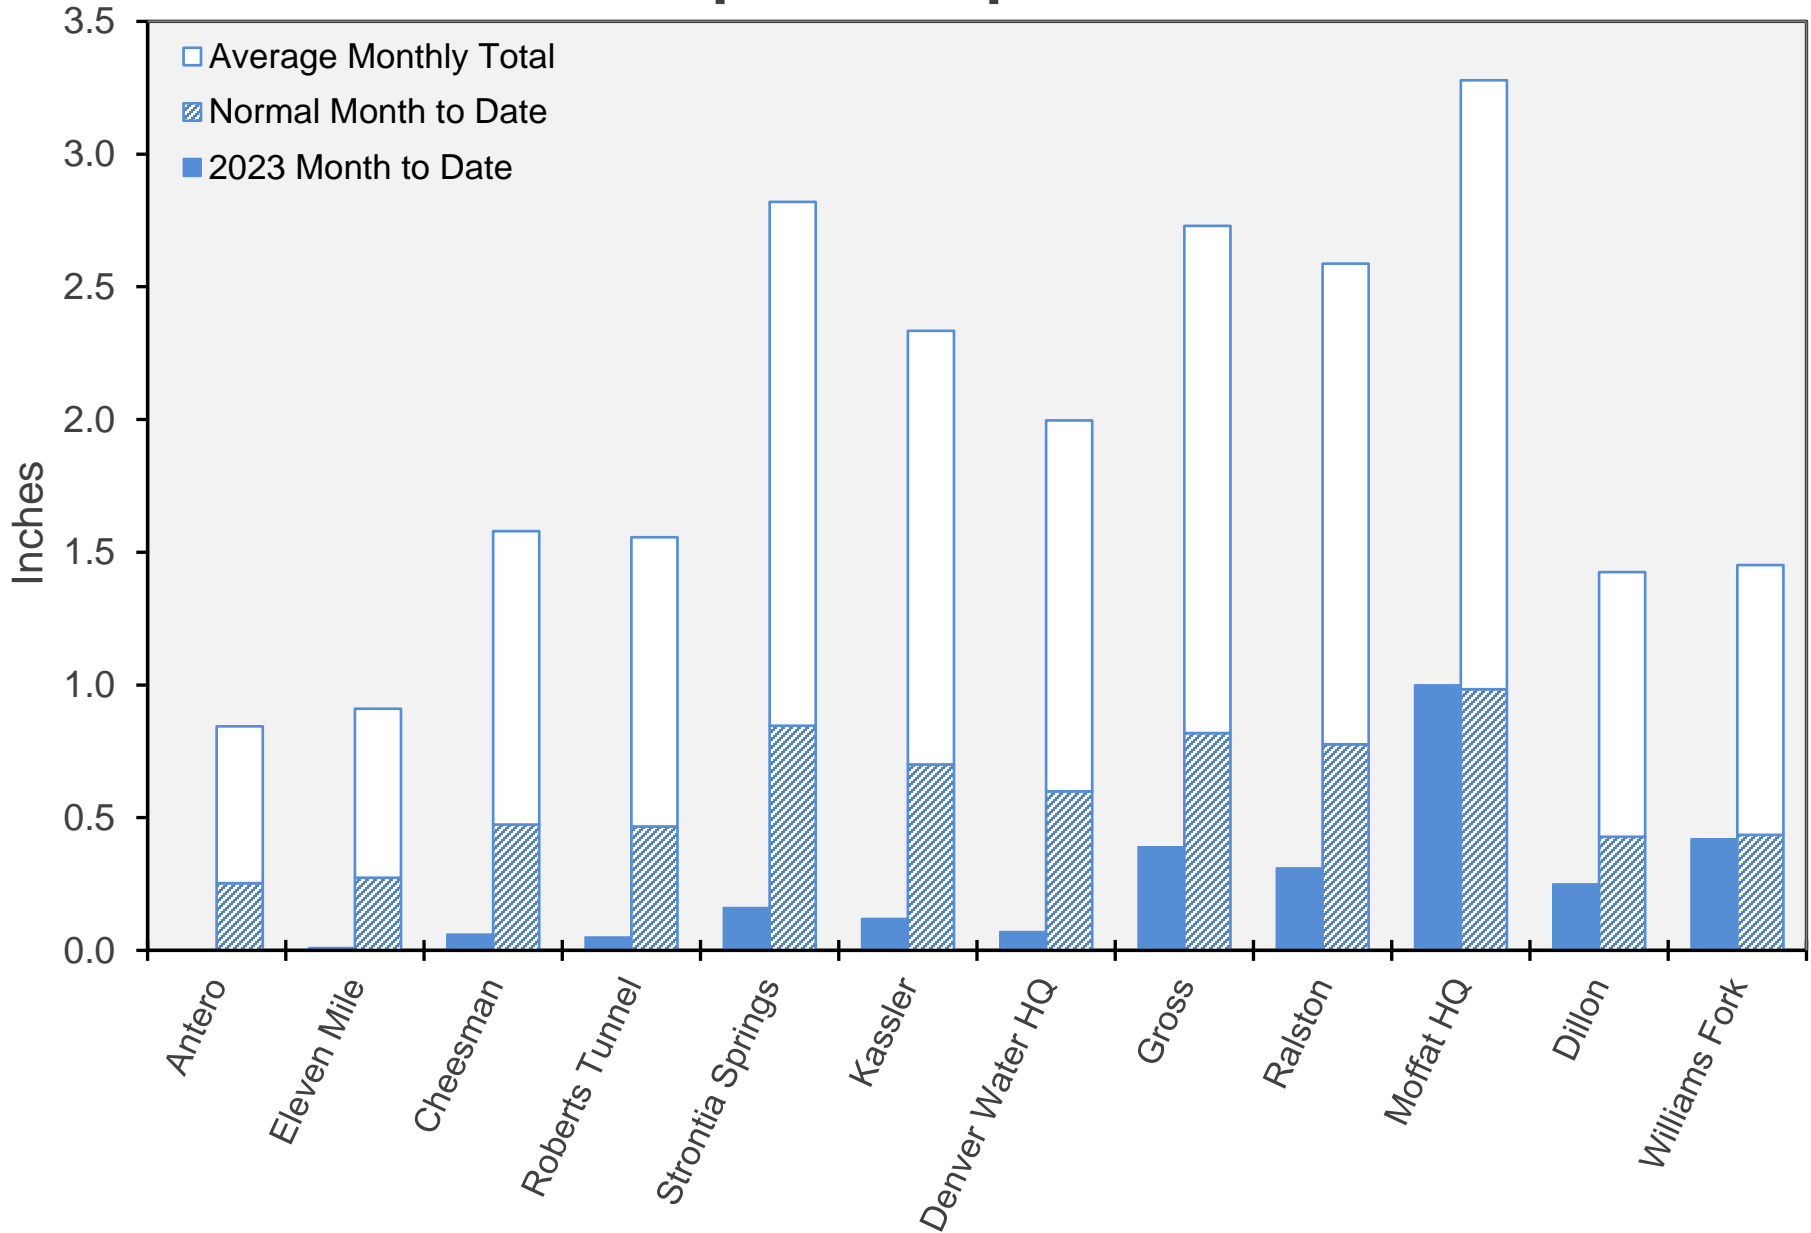

Note: Denver Water forecasts seasonal reservoir storage contents under dry future weather, normal future weather and wet future weather scenarios.

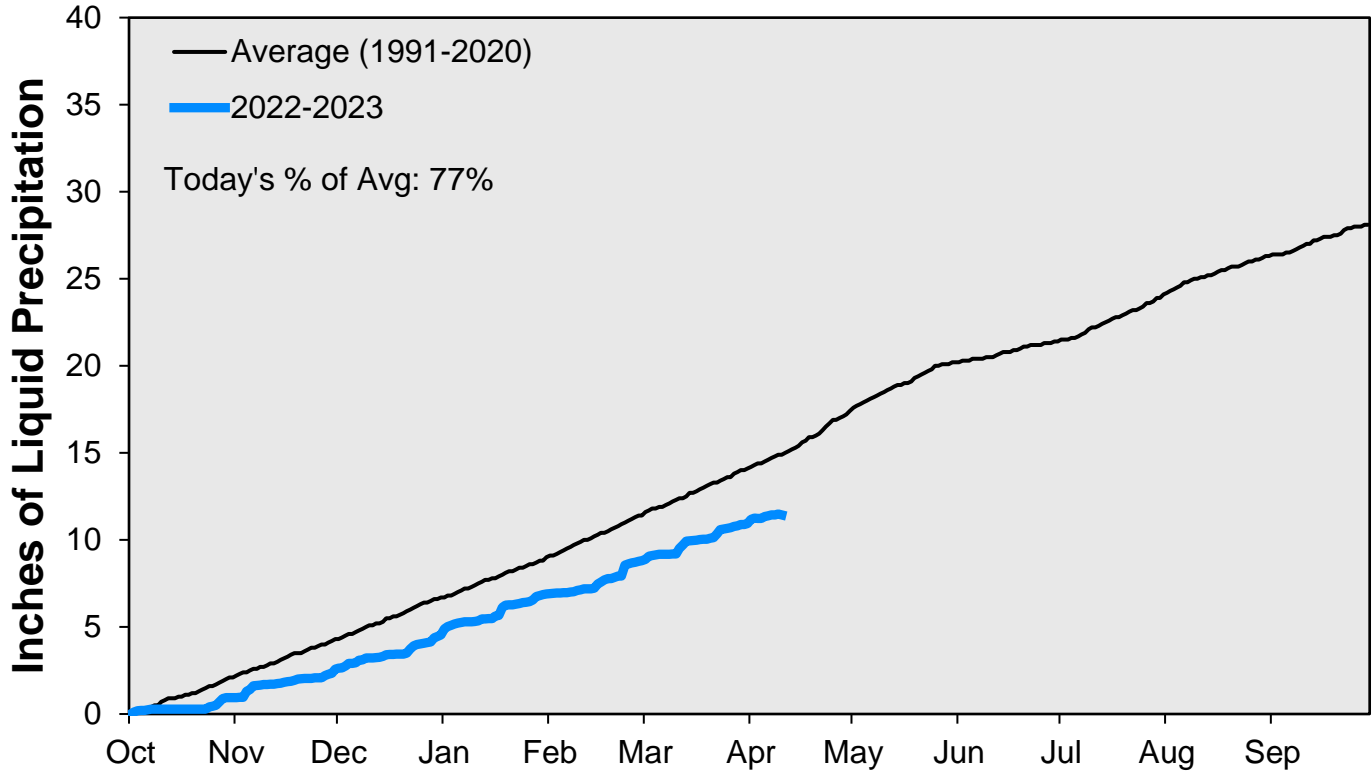

Gross Reservoir storage is limited to 29,938 acre feet in total storage during construction activities. The percent full figures are based on the normal usable capacity of 29,811 acre feet.

April 10, 2023

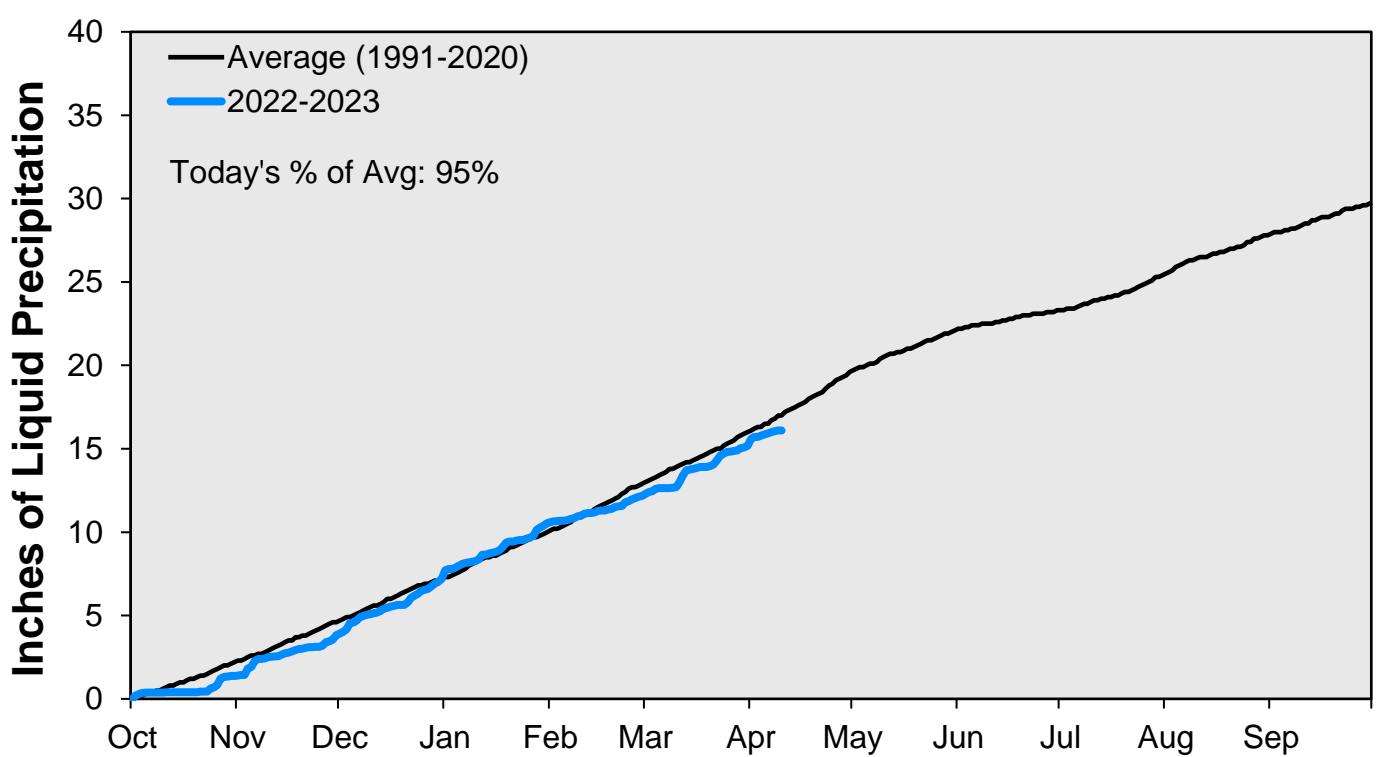

April Precipitation

CUMULATIVE PRECIPITATION: SOUTH PLATTE RIVER

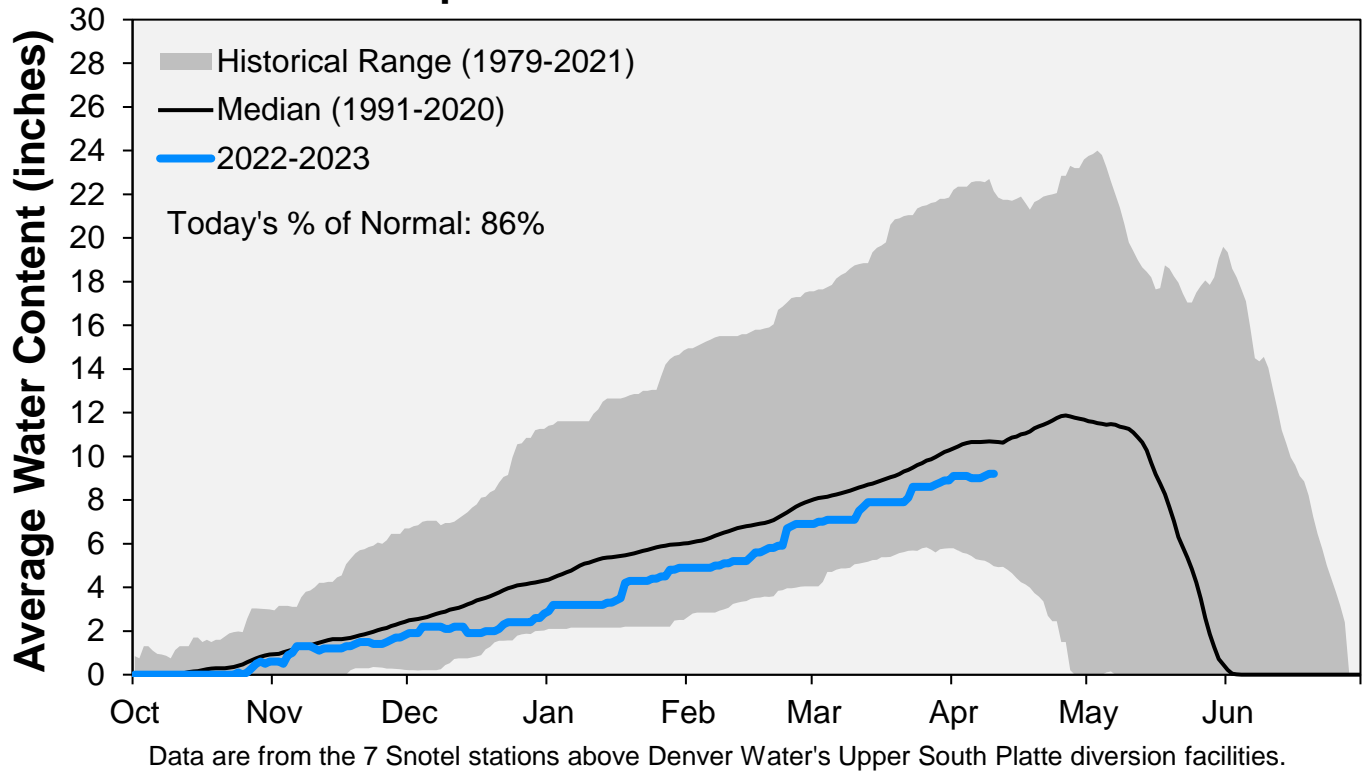

CUMULATIVE PRECIPITATION: COLORADO RIVER WATERSHED

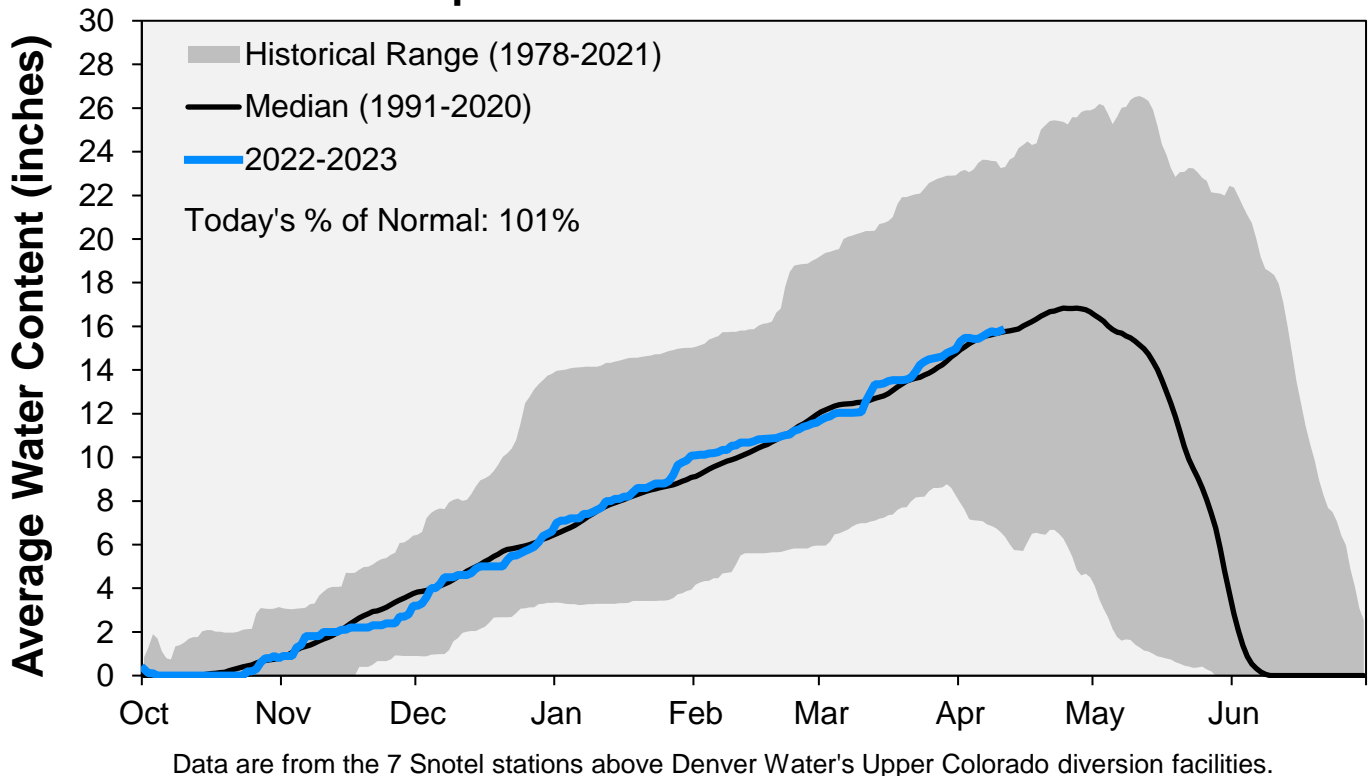

Data are from the 7 SNOTEL stations above Denver Water's Upper Colorado diversion facilities.

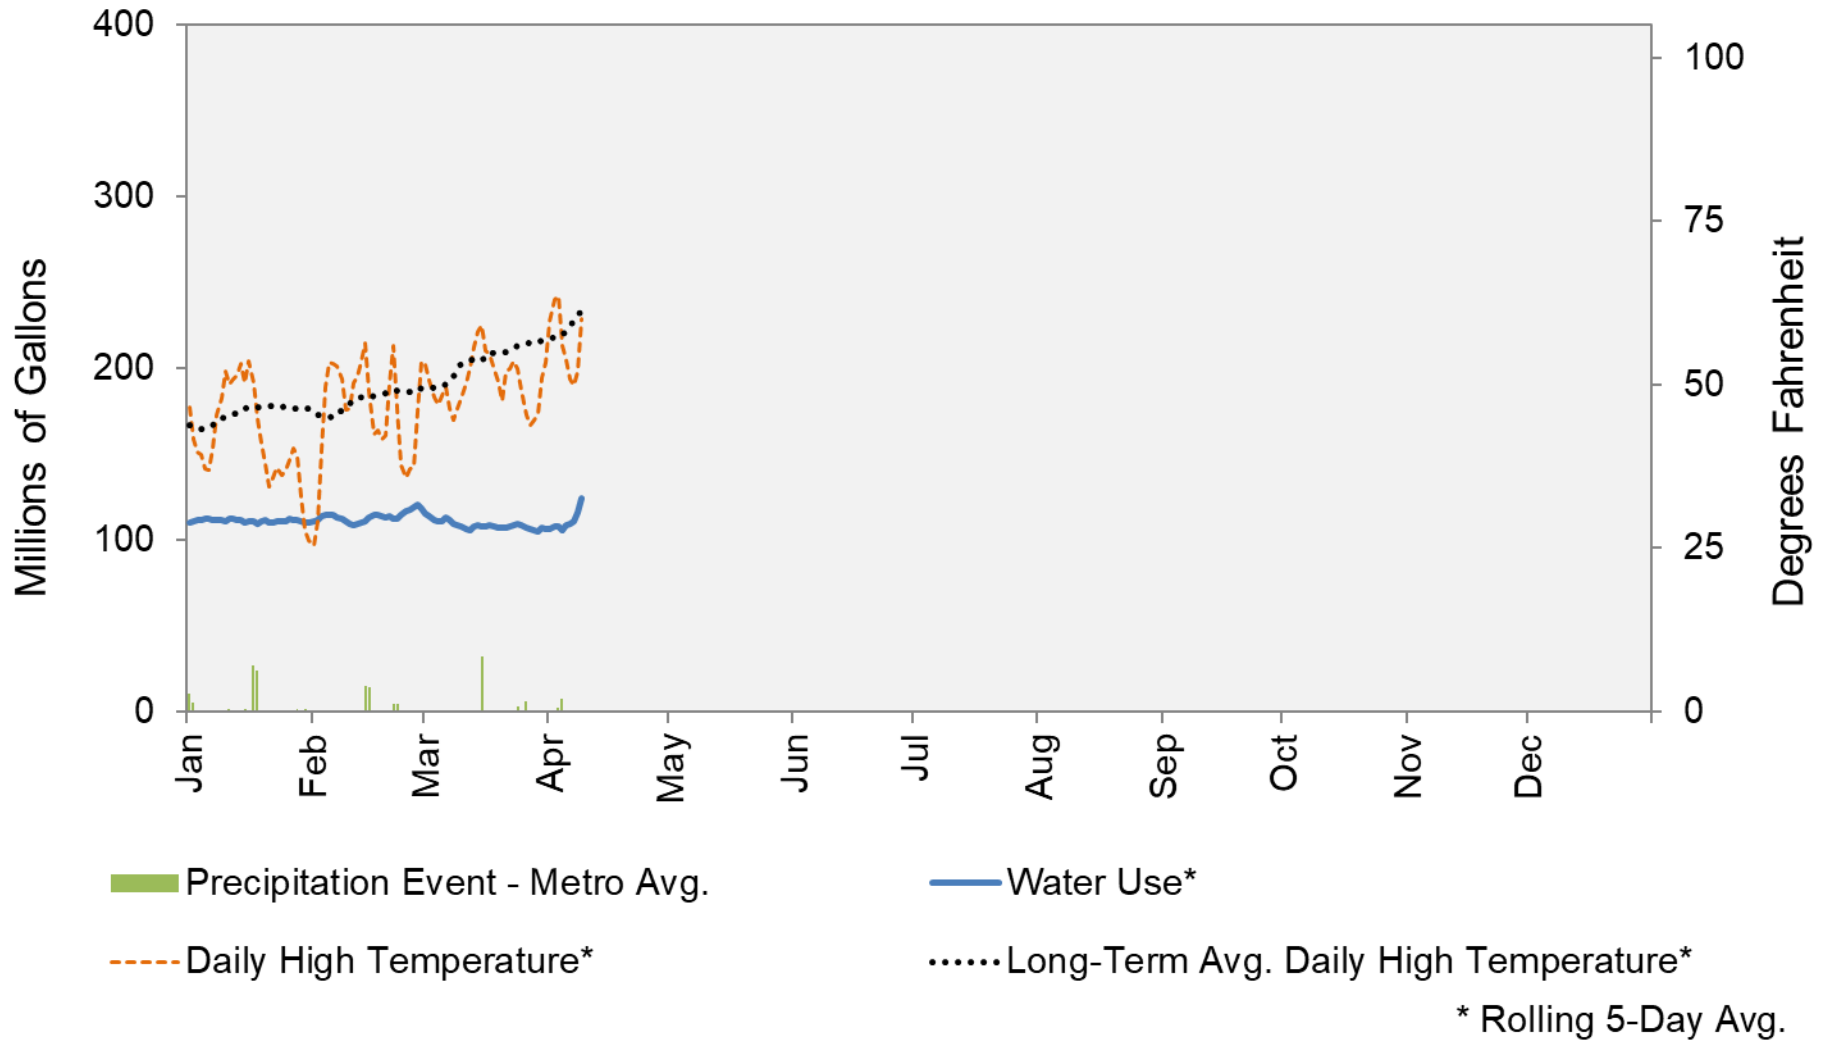

Snowpack: South Platte River Watershed

Snowpack: Colorado River Watershed

2023 Water Use and Weather Conditions

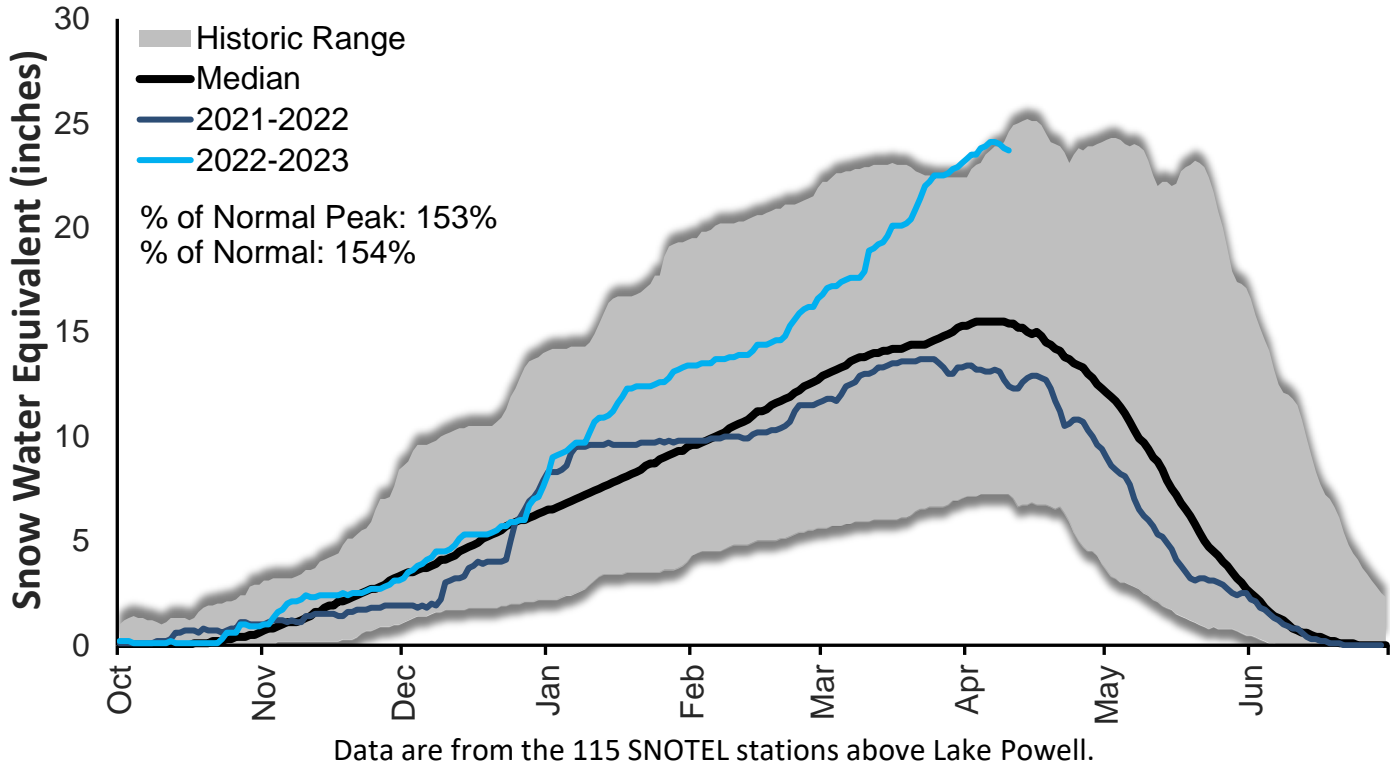

April 10, 2023

Denver Water Use and Reservoir Contents 2023													
	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	YTD-Avg
Predicted End-of-Month Supply Reservoir Contents (Full = 518,449 AF)	422,200												
Actual End-of-Month Supply Reservoir Contents (AF)	427,785	423,299	418,434										
Actual % Full	83%	82%	81%										
Historical Median % Full	81%	80%	79%	79%	88%	98%	95%	92%	88%	85%	84%	83%

	31	113		101									
Monthly Average	111	114	108	117									111
% of 2023 Expected Daily Use	109%	112%	106%	93%									107%

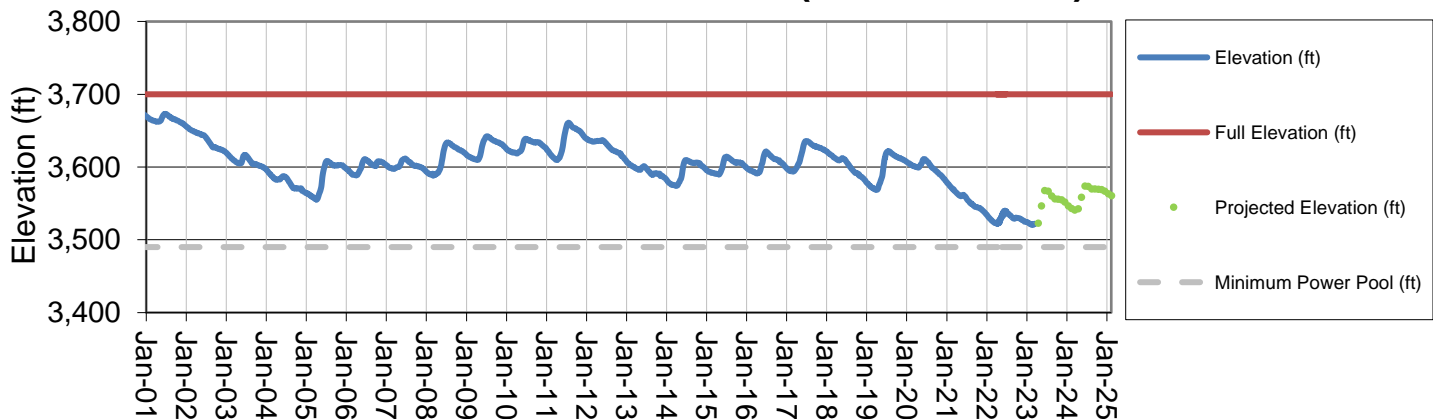

Notes: 1) "AF" denotes acre-feet. "MG" denotes million gallons. 2) Expected Daily Use is based on historical use with normal weather conditions. 3) The predicted end-of-month supply reservoir contents figures assume normal weather after April 3rd, 2023. 4) The differences between predicted and actual end-of-month supply reservoir contents are the result of normal estimation error of daily use, supply, evaporation, carriage losses and raw water deliveries. 5) Predicted supply reservoir contents last updated on April 3rd, 2023. 6) Daily water figures are subject to change.

Lake Powell Report*

Colorado River Above Lake Powell Snowpack

Lake Powell Elevation (2001-Current)

* Denver Water gets half of its water supply from the Colorado River and closely monitors conditions at Lake Powell and within the greater Colorado River Basin.
