

WATER WATCH REPORT

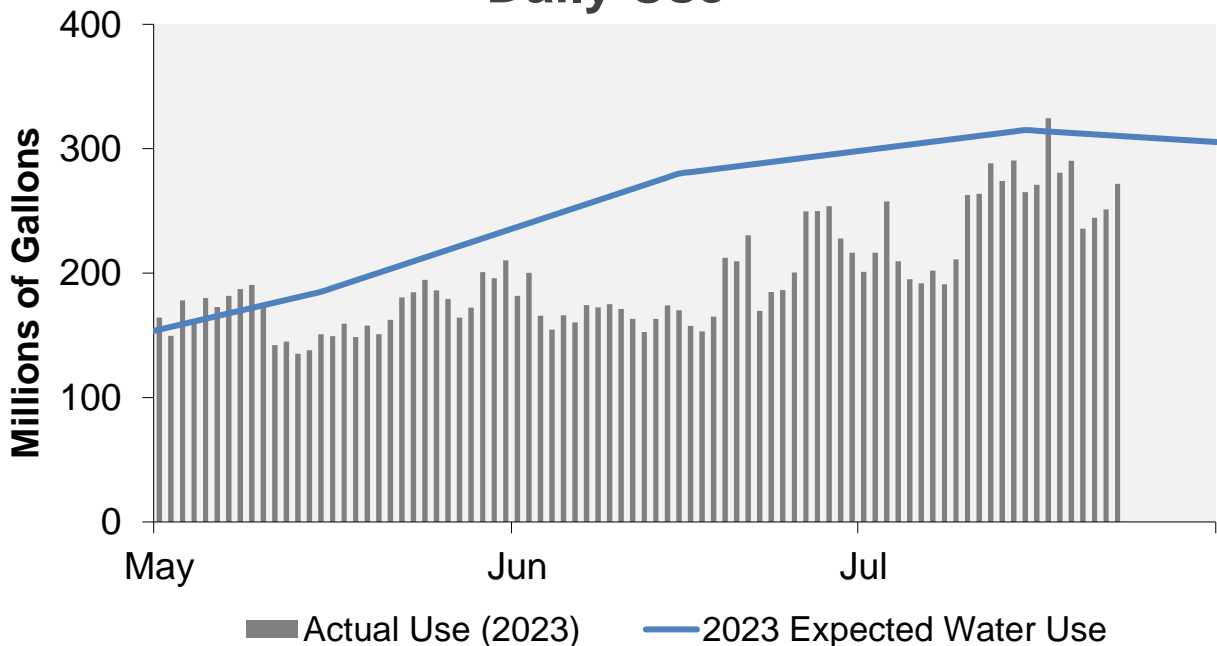

July 24, 2023

Supply Reservoir Contents

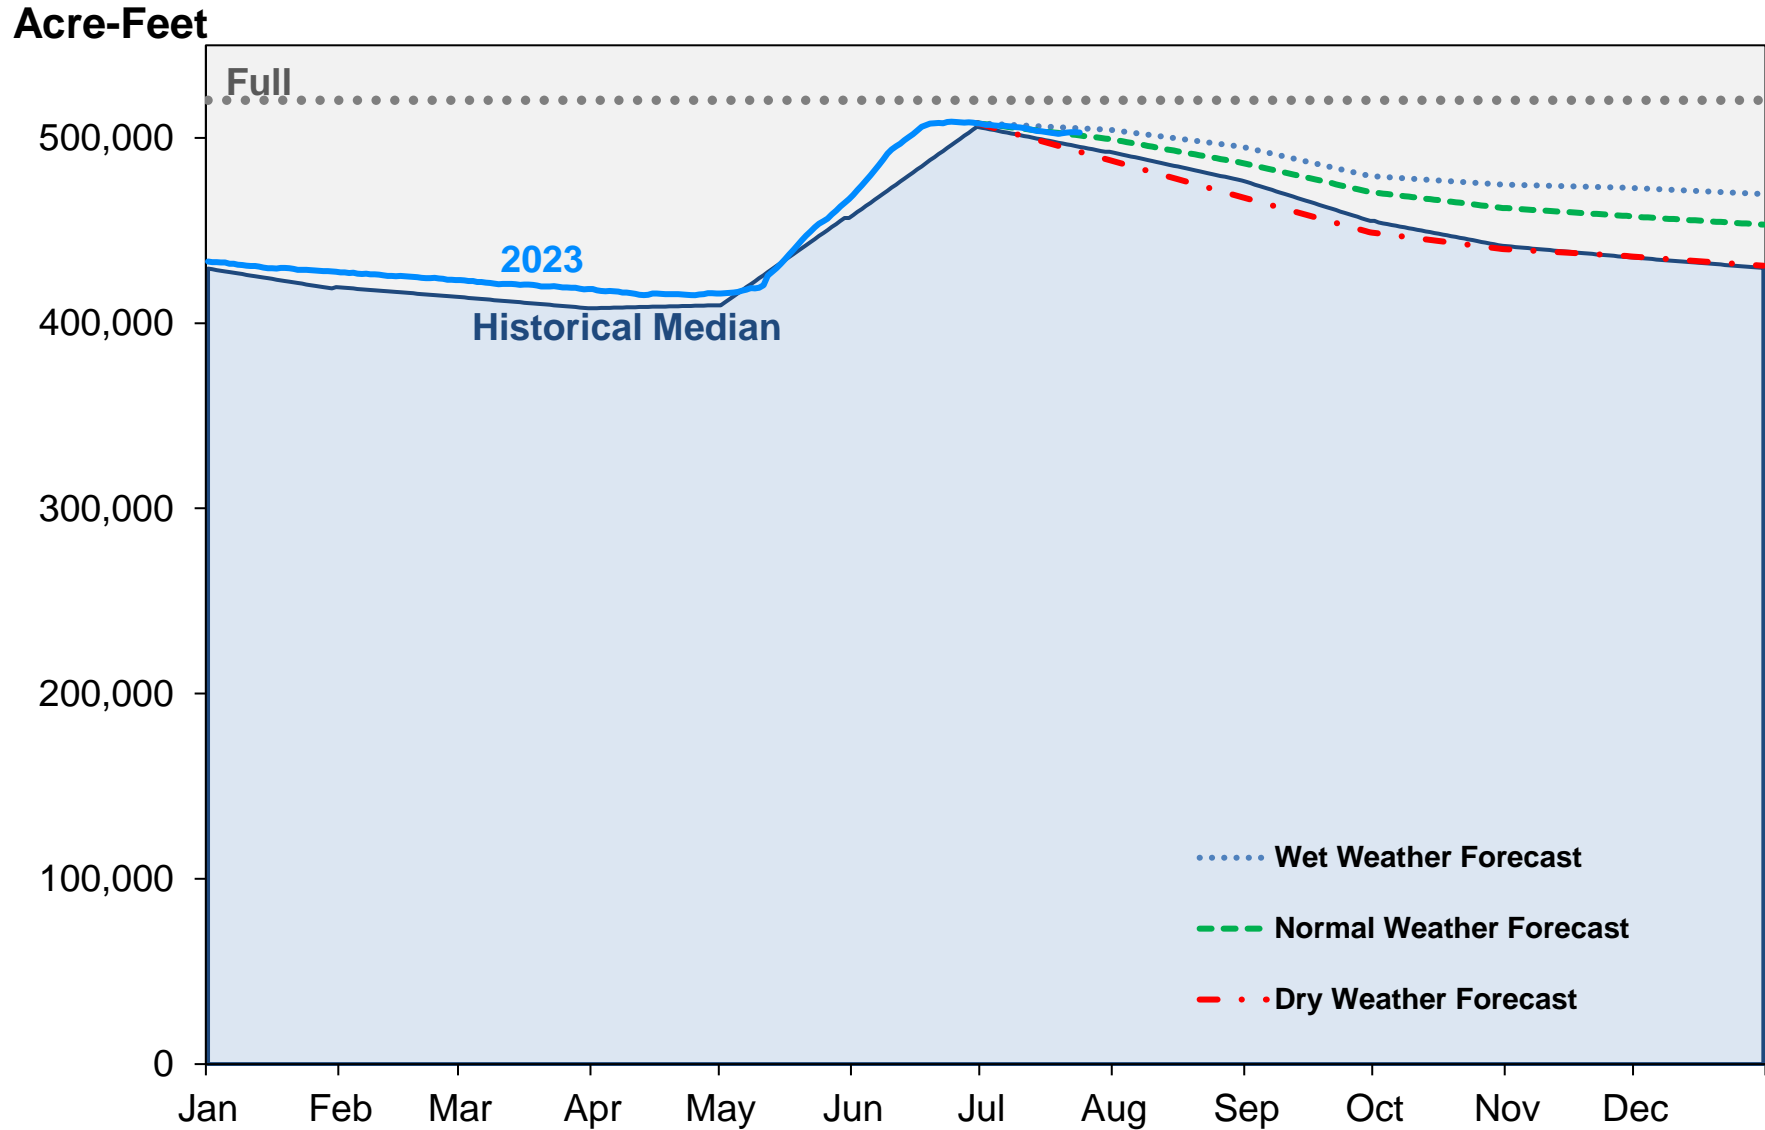

Reservoir	Capacity		Current Usable Contents (acre-feet)	Percent Full		
	(acre-feet)			Current	Last Year	Historical Median
	Total	Usable	Year		Median	
Antero	20,122	20,067	19,999	100%	101%	100%
Eleven Mile	97,779	97,779	99,040	101%	102%	103%
Cheesman	79,064	79,064	77,760	98%	96%	99%
Marston	19,108	13,133	9,552	73%	67%	76%
Strontia Springs	7,863	7,163	6,812	95%	87%	94%
Chatfield	28,709	12,415	12,365	100%	37%	76%
Dillon	257,304	249,095	250,927	101%	93%	100%
Gross*	41,811	29,811	15,690	53%	53%	95%
Ralston	10,776	7,276	6,472	89%	90%	91%
Meadow Creek	5,370	4,520	4,204	93%	95%	88%
Total	567,906	520,323	502,841	97%	91%	96%

*Gross Reservoir storage is limited to 29,938 acre feet in total storage during construction activities. The percent full figures are based on the normal usable capacity of 29,811 acre feet.

Daily Use

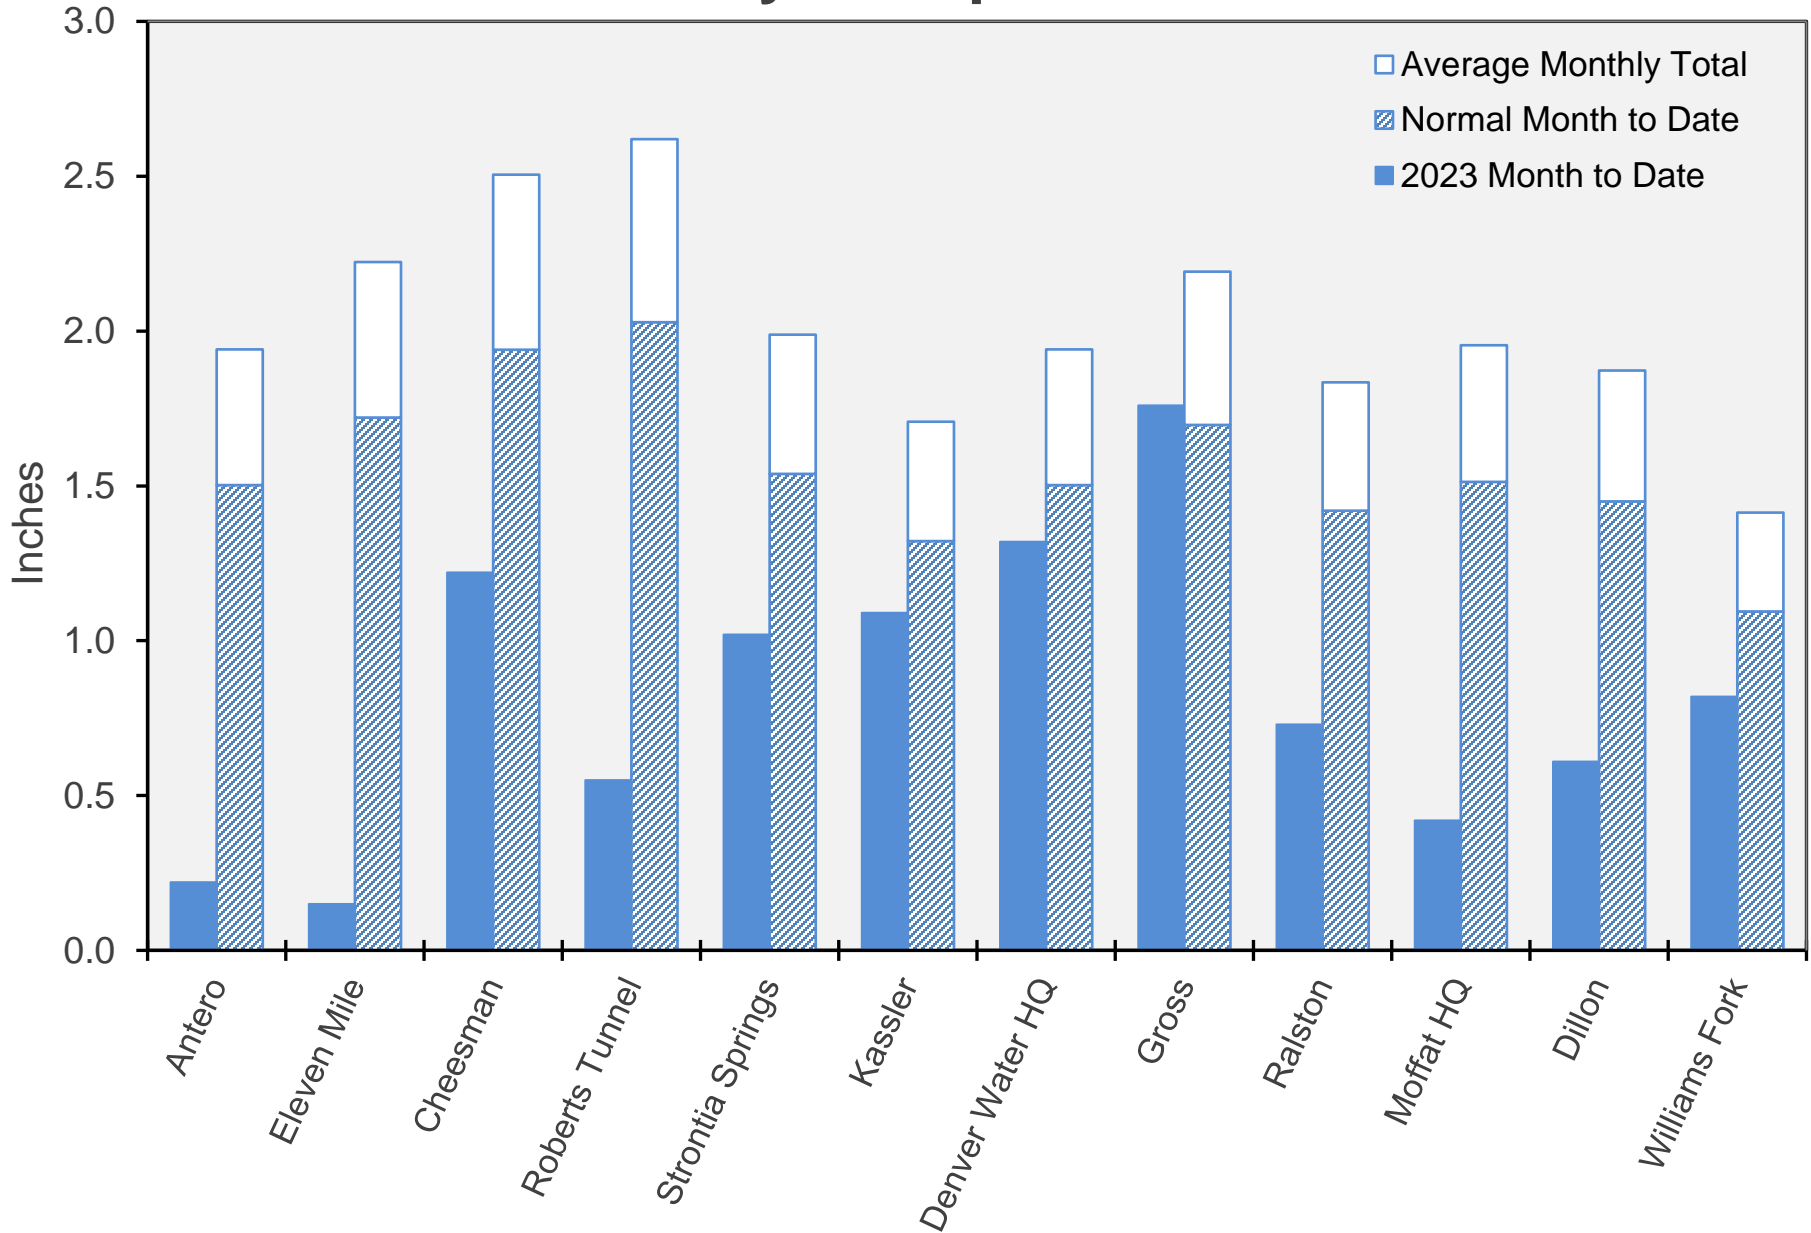

Supply Reservoir Contents

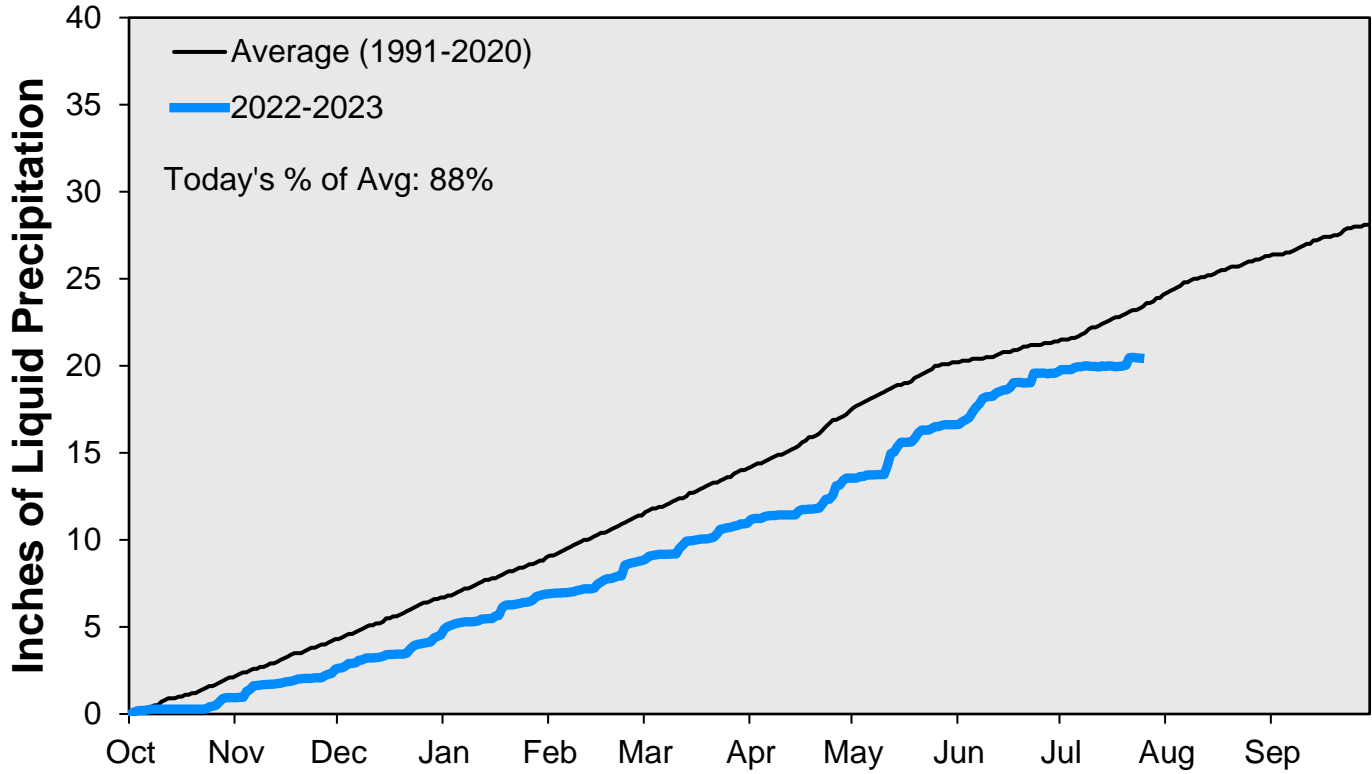

Note: Denver Water forecasts seasonal reservoir storage contents under dry future weather, normal future weather and wet future weather scenarios.

Gross Reservoir storage is limited to 29,938 acre feet in total storage during construction activities. The percent full figures are based on the normal usable capacity of 29,811 acre feet.

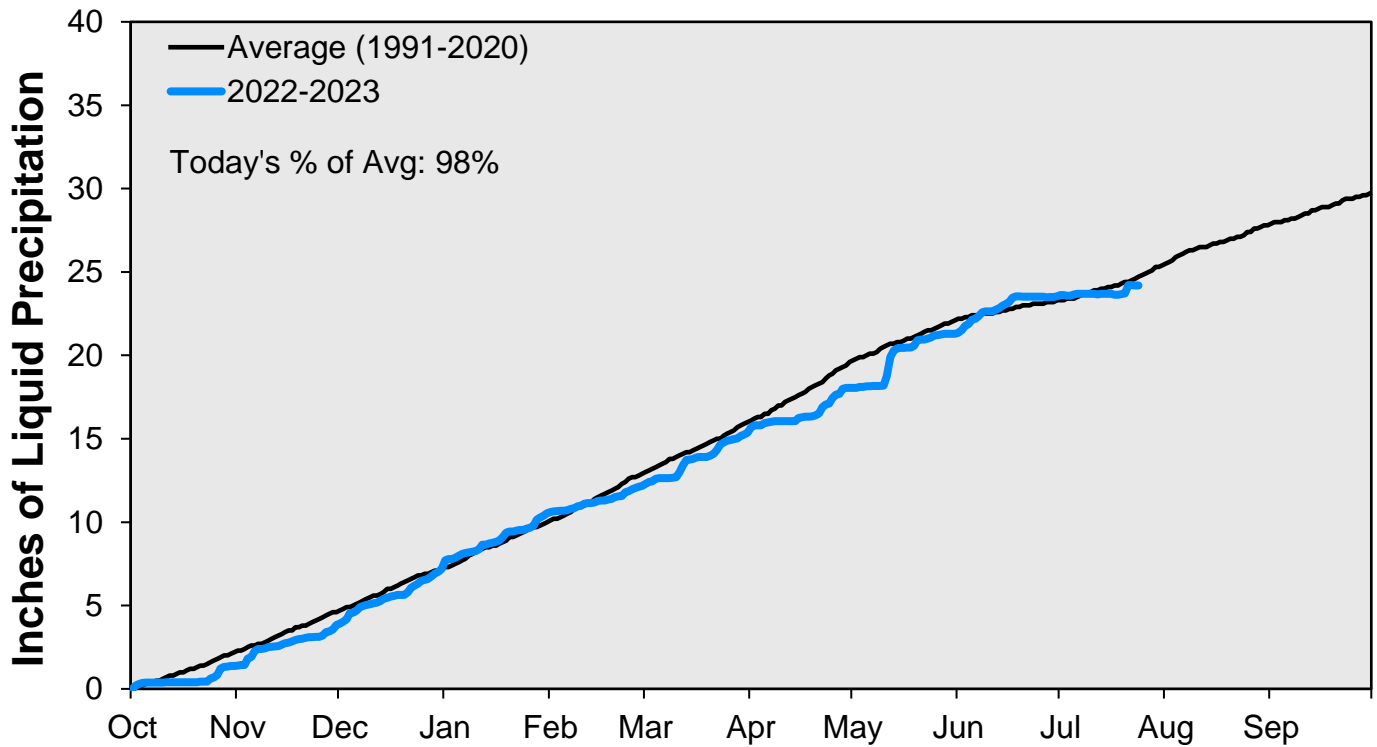

July Precipitation

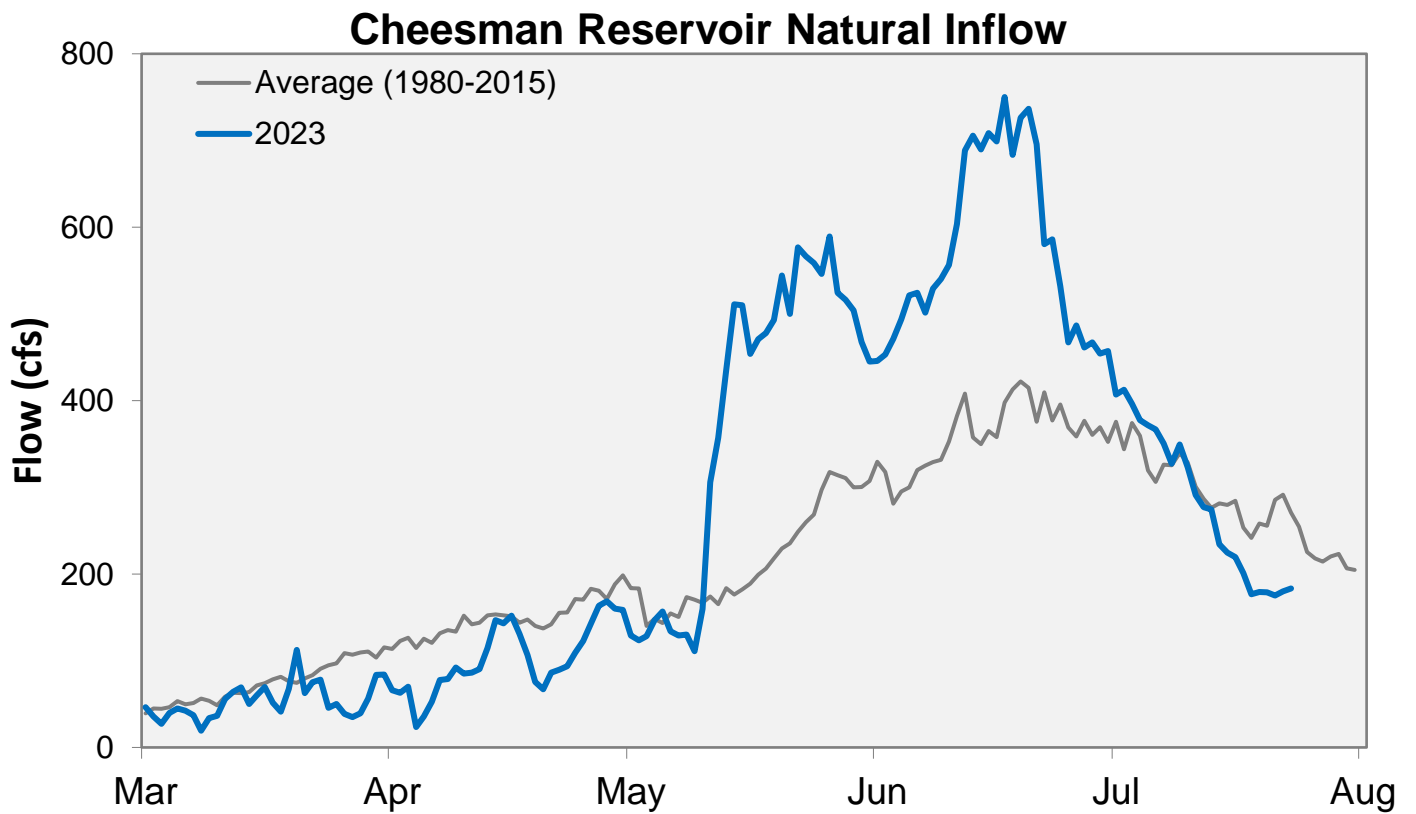

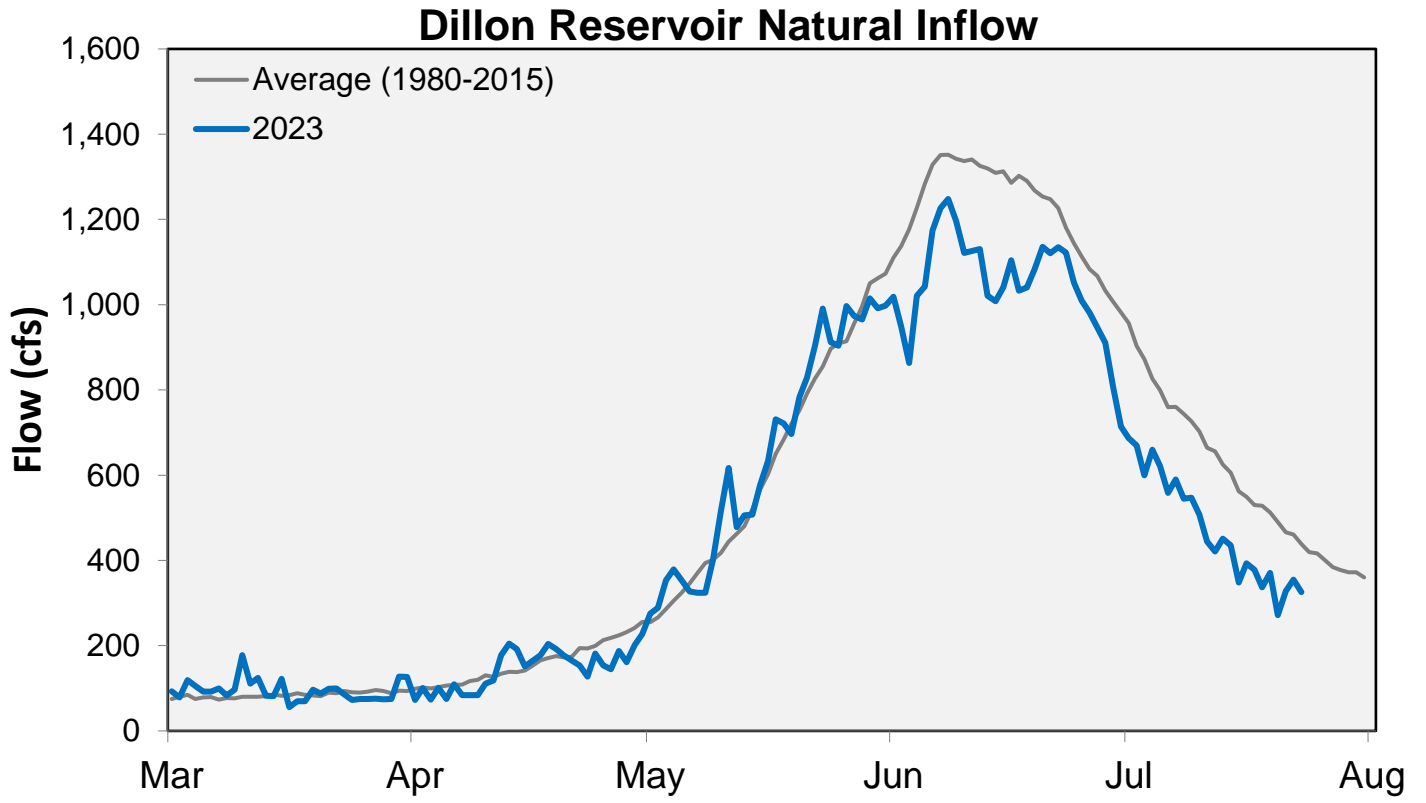

Cumulative Precipitation: South Platte River

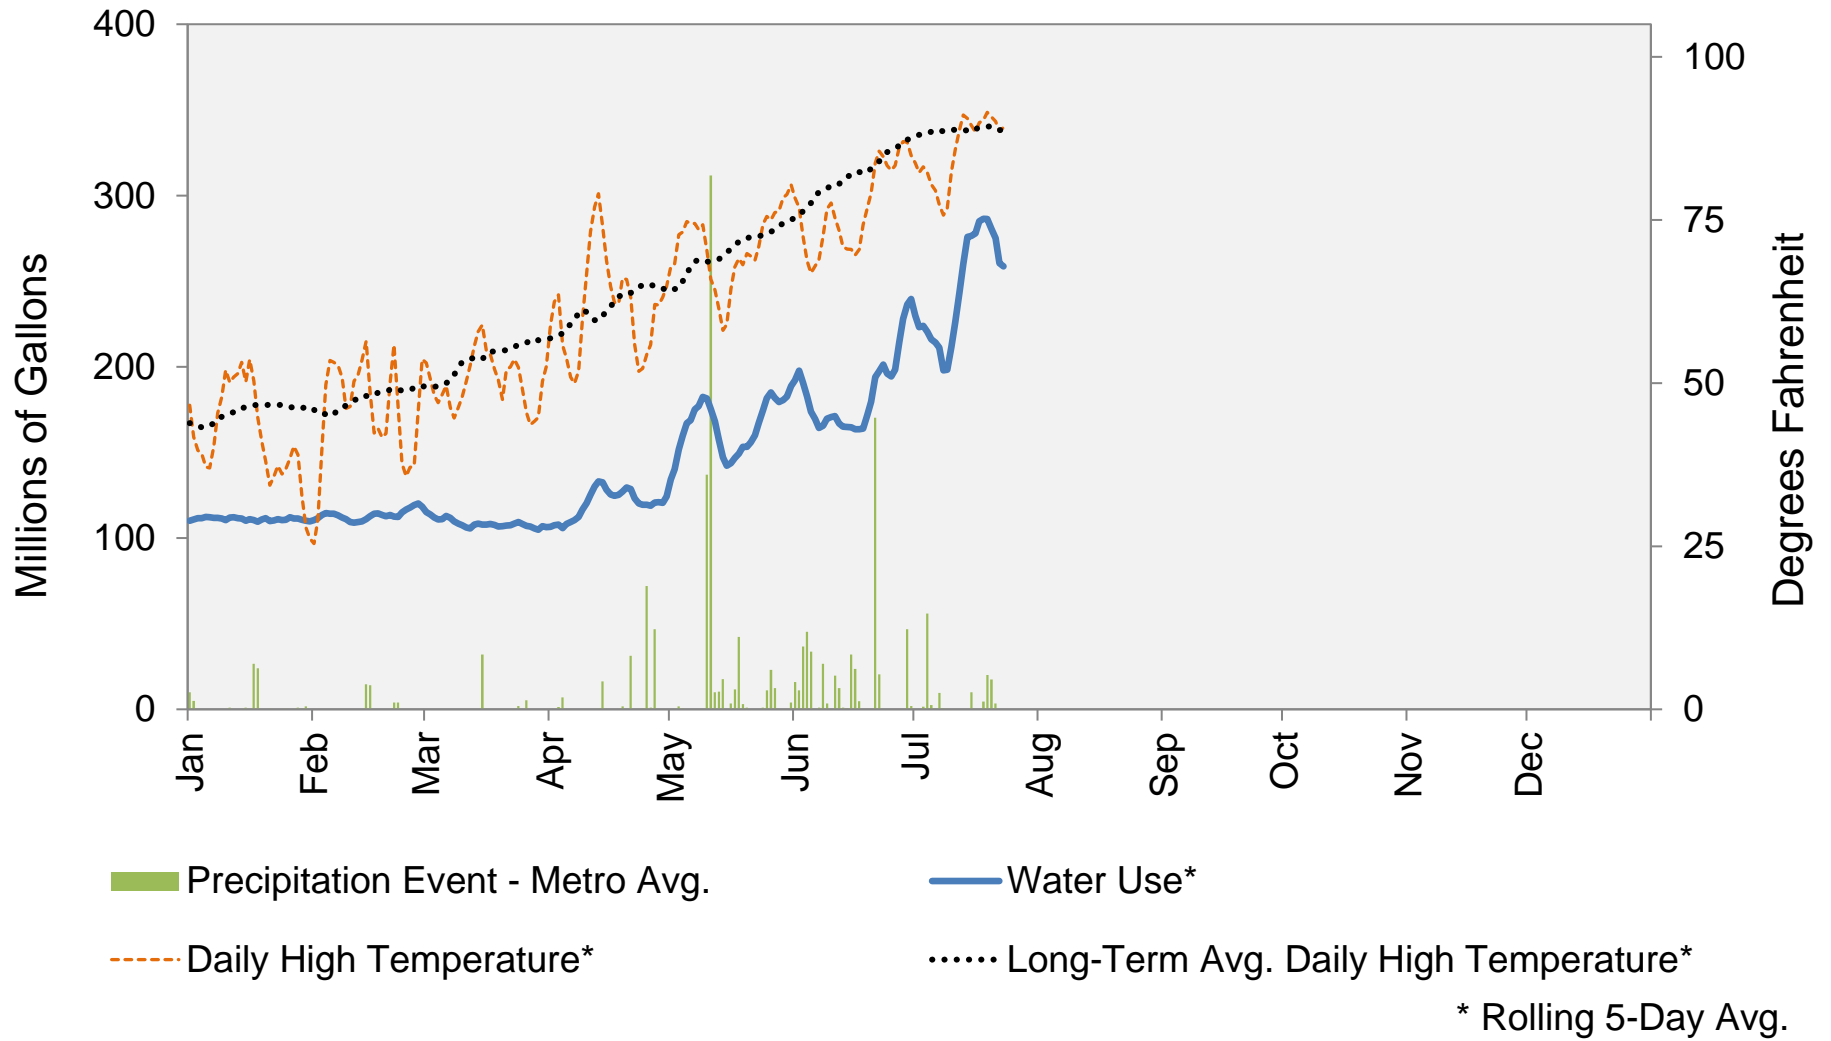

Cumulative Precipitation: Colorado River

Data are from the 7 SNOTEL stations above Denver Water's Upper Colorado diversion facilities.

2023 Water Use and Weather Conditions

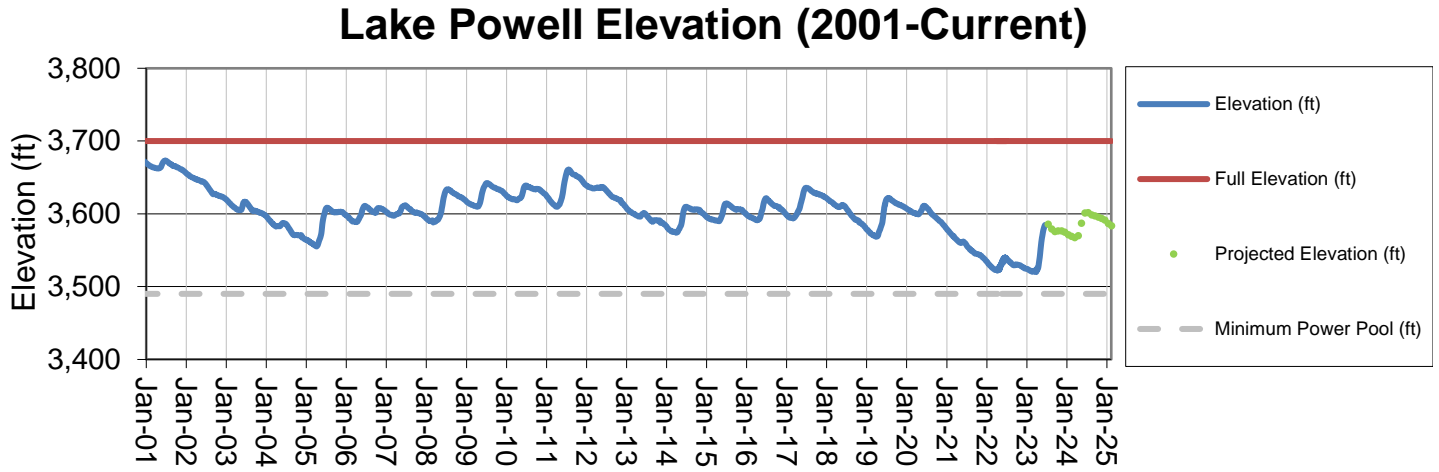

July 24, 2023

Denver Water Use and Reservoir Contents 2023													
	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	YTD-Avg
Predicted End-of-Month Supply Reservoir Contents (Full = 518,449 AF)	499,000												
Actual End-of-Month Supply Reservoir Contents (AF)	427,785	423,299	418,434	416,025	467,021	507,913							
Actual % Full	83%	82%	81%	80%	90%	98%							
Historical Median % Full	81%	80%	79%	79%	88%	98%	95%	92%	88%	85%	84%	83%	
2023 Expected Daily Use (MG)	102	102	102	125	190	275	310	297	270	172	108	102	168
Actual Daily Use (MG)	1	105	111	105	107	164	182	201					
	2	115	116	114	111	150	200	217					
	3	113	119	109	108	178	166	258					
	4	112	114	112	102	163	155	210					
	5	117	111	114	113	180	166	195					
	6	104	111	114	113	173	160	192					
	7	112	111	109	117	182	174	202					
	8	114	112	99	117	187	173	191					
	9	110	110	106	123	190	175	211

	29	109		106	124	201	228						
	30	108		112	143	196	217						
	31	113		101	210								
Monthly Average	111	114	108	122	169	187	247						
% of 2023 Expected Daily Use	109%	112%	106%	97%	89%	68%	80%						

Notes: 1) "AF" denotes acre-feet. "MG" denotes million gallons. 2) Expected Daily Use is based on historical use with normal weather conditions. 3) The predicted end-of-month supply reservoir contents figures assume normal weather after July 1st, 2023. 4) The differences between predicted and actual end-of-month supply reservoir contents are the result of normal estimation error of daily use, supply, evaporation, carriage losses and raw water deliveries. 5) Predicted supply reservoir contents last updated on July 1st, 2023. 6) Daily water figures are subject to change.

Lake Powell Report*

* Denver Water gets half of its water supply from the Colorado River and closely monitors conditions at Lake Powell and within the greater Colorado River Basin.
